

American Electric Power

801 Pennsylvania Ave. NW, Suite 320 Washington, DC 20004-2615 AEP.com

February 26, 2014

Honorable Kimberly D. Bose, Secretary Federal Energy Regulatory Commission 888 First Street, N.E., Room 1A Washington, D.C. 20426

Re: American Electric Power Service Corporation

Docket No. ER14- 1375-000

Dear Secretary Bose:

Pursuant to Section 205 of the Federal Power Act, 16 U.S.C. Section 824(d), and Section 35.13 of the Federal Energy Regulatory Commission's ("FERC" or "Commission") regulations, American Electric Power Service Corporation ("AEPSC"), on behalf of its affiliates, Appalachian Power Company, Indiana Michigan Power Company, Kentucky Power Company, Kingsport Power Company, Ohio Power Company, and Wheeling Power Company (together, "AEP East Operating Companies"), submits for filing revisions to the formula rate of the AEP East Operating Companies, Attachment H-14 of the PJM Interconnection, L.L.C. ("PJM") Open Access Transmission Tariff ("PJM Tariff") to update the base Post-employment Benefits Other than Pensions ("PBOP") expense as contemplated in the formula rate settlement approved by the Commission ("Attachment H-14 Settlement").²

I. Background

In Docket No. ER08-1329, AEP submitted for filing a formula rate and implementation protocols for the AEP pricing zone under Attachment H-14 of the PJM Tariff. The Commission accepted AEP's rate filing subject to hearing and settlement judge procedures and a compliance filing.³ AEP and the intervening parties in Docket No. ER08-1329 ultimately settled all issues raised with respect to the formula rate, and the Commission approved the Attachment H-14 Settlement on October 1, 2010.⁴

_

AEPSC and the AEP East Operating Companies are collectively referred to as "AEP."

² See American Electric Power Service Corp., 133 FERC ¶ 61,007 (2010).

³ See American Electric Power Service Corp., 124 FERC ¶ 61,306 (2008).

⁴ See n.2.

Honorable Kimberly D. Bose February 26, 2014 Page 2 of 5

The principles of the Attachment H-14 Settlement are incorporated into the PJM Tariff as Appendix A to Attachment H-14A. Section I.C.6 provides that, during the annual update process conducted in 2013 (and every four years thereafter), AEP will undergo a review of PBOP costs and submit a single issue filing under Section 205 of the FPA to update the PBOP expense in the formula rate provided certain thresholds are met. In particular, Section I.C.6.iii provides:

During the annual update process conducted in 2013, and every four years thereafter, Worksheet O will be used to determine whether, and if so by what amount, the PBOP allowance should be adjusted going forward for the next four years. If the Annual Actuarial Report produced for that year projects PBOP costs during the next four years, taken together with the then current cumulative PBOP cost/allowance position, will, absent a change in the PBOP allowance, cause the AEP Companies to over or under collect their cumulative PBOP costs by more than 20% of the projected next four year's total cost, the PBOP allowance shall be adjusted.

Section I.C.6.iii proceeds to describe the methodology for calculating the percentage of over or under collection, explaining:

In order to determine whether the AEP Companies' cumulative allowance of PBOP costs under the formula rate will result in a cumulative over or under-recovery of actual PBOP expenses exceeding 20% over the subsequent four year period, Worksheet O will be used to determine the following PBOB cost/allowance values:

- (a) the level of cumulative over or under collections during the period since the PBOP allowance was last set, including carrying costs based on the weighted average cost of capital ("WACC") each year from the Formula rate True-Up transmission cost-of-service ("TCOS") analyses;
- (b) the cumulative net present value ("CNPV") of projected PBOP costs during the next four years, as estimated by the then current Actuarial Report, assuming a discount rate equal to the True-Up TCOS WACC for the prior calendar year ("Prior Year WACC"); and
- (c) the CNPV of continued collections over the next four years based on the then effective PBOP allowance, assuming a discount rate equal to the Prior Year WACC.

If the absolute value of (a) + (b) - (c) exceeds 20% of (b), then the PBOP allowance used in the formula rate calculation shall be changed to the value that will cause the projected result of (a) + (b) - (c) to equal zero. If the projected over or under collection during the next four years, (a) + (b) - (c), will be less than 20% of (b), then the PBOP Allowance will continue in effect for the next four years at the then effective rate.

Honorable Kimberly D. Bose February 26, 2014 Page 3 of 5

Section I.6.C.iii further prescribes next steps in the event the calculation results in an over or under-recovery of more than 20%, explaining:

If it is determined through the foregoing procedure that the AEP Companies' cumulative PBOP expense allowance will over-recover or under-recover actual PBOP expenses by more than 20% over the subsequent four-year period, AEP shall make a filing under FPA § 205 to change the PBOP expense stated in the formula rate. No other changes to the formula rate may be included in that filing. Neither AEP nor any Settling Party may raise in connection with such filing any issue affecting the formula rate other than the level of allowable PBOP expense.

II. Description of Proposed Changes

Consistent with the requirements of the Attachment H-14 Settlement, AEP conducted a review of its PBOP costs and determined that the current expense allowance will cause the AEP East Operating Companies to over collect their cumulative PBOP costs by more than 20% of the projected next four years' total cost. In particular, as shown in the analysis attached as Attachment A to this filing, the current PBOP allowance contained in Attachment H-14 (\$48.1 million) will exceed the 20% threshold, with an over recovery 58% greater than the projected amount supported by current actuarial projections.

Consequently, through this single issue Section 205 filing, AEP seeks an adjustment to the PBOP expense allowance provided in Attachment H-14 to decrease the base PBOP expense to approximately \$30 million. Although the difference between the current PBOP allowance contained in Attachment H-14 of \$48.1 million and the revised amount of \$30 million is \$18.1 million, the effect on the revenue requirement will be a fraction of that amount – a decrease of approximately \$1,000,000. This is because AEP uses an allocator methodology to assign recoverable PBOP expenses among the various AEP affiliates.

III. Effective Date and Waiver Request

As contemplated in the principles of the Attachment H-14 Settlement, AEP seeks an effective date of July 1, 2014 of the proposed changes to update the PBOP expense allowance as described herein. AEP respectfully requests that the Commission waive provisions of section 35.13 or any other applicable regulation to the extent necessary to permit this request.

While implementation of AEP's request will result in an overall decrease in the revenue requirement, AEP notes that the process and criteria for revising the PBOP expense allowance was an agreed-upon aspect of the Attachment H-14 Settlement. Therefore, the request in this filing relates to the implementation of the formula rate as originally approved and is not a change to the design of the formula rate itself.

IV. Contents of this Filing

This filing consists of the following documents:

Honorable Kimberly D. Bose February 26, 2014 Page 4 of 5

- a. This transmittal letter;
- b. A spreadsheet setting forth the calculation of the change in the PBOP expense (Attachment A);
- c. A marked version of Attachment H-14B (Attachment B); and
- d. A clean version of Attachment H-14B (Attachment C).

Pursuant to Section 35.7 of the Commission's regulations,⁵ the contents of this filing are being submitted as part of an XML filing package that conforms to the Commission's eTariff instructions.

V. Service

PJM has served a copy of this filing on all PJM Members and on all state utility regulatory commissions in the PJM Region by posting this filing electronically. In accordance with the Commission's regulations, PJM will post a copy of this filing to the FERC filings section of its internet site, located at the following link: http://www.pjm.com/documents/ferc-manuals/ferc-filings.aspx with a specific link to the newly-filed document, and will send an e-mail on the same date as this filing to all PJM Members and all state utility regulatory commissions in the PJM Region alerting them that this filing has been made by PJM and is available by following such link. PJM also serves the parties listed on the Commission's official service list for this docket. If the document is not immediately available by using the referenced link, the document will be available through the referenced link within 24 hours of the filing. Also, a copy of this filing will be available on the Commission's eLibrary website located at the following link: http://www.ferc.gov/docs-filing/elibrary.asp in accordance with the Commission's regulations and Order No. 714.

Additionally, copies of this filing are also being made available on AEP's website at: http://www.aep.com/about/codeofconduct/OASIS/TariffFilings/

VI. Correspondence

Correspondence relating to this filing should be addressed to:

Amanda Riggs Conner
American Electric Power
Service Corporation
801 Pennsylvania Ave NW, Suite 320

David B. Weiss
American Electric Power
Service Corporation
1 Riverside Plaza

Pursuant to Order No. 714, this filing is submitted by PJM on behalf of AEPSC as part of an XML filing package that conforms to the Commission's regulations. PJM has agreed to make all filings on behalf of the PJM Transmission Owners in order to retain administrative control over the PJM Tariff. Thus, AEPSC has requested PJM submit this revised Attachment H-14B in the eTariff system as part of PJM's electronic Intra PJM Tariff.

⁶ See 18C.F.R §§ 35.2(e) and 385.2010(f)(3).

PJM already maintains, updates and regularly uses e-mail lists for all PJM members and affected state commissions.

Honorable Kimberly D. Bose February 26, 2014 Page 5 of 5

e-mail: arconner@aep.com e-mail: dbweiss@aep.com

VII. Conclusion

Wherefore, AEP respectfully requests that the Commission accept these revised tariff sheets, effective July 1, 2014 for the AEP East Operating Companies and grant any applicable waivers.

Respectfully submitted,

/s/ Amanda R. Conner

Amanda R. Conner Senior Counsel American Electric Power Service Corporation

Effective State Tax Rate	0.00%
Total Effective State Income Tax Rate	0.00%

The Ohio State Income Tax is being phased-out pro rata over a 5 year period from 2005 through 2009. The taxable portion of income is 20% in 2009. The phase-out factors can be found in the Ohio Revised Code at 5733.01(G)2(a)(v). This tax has been replaced with a Commercial Activities Tax that is included in Schedule H and H-1.

Note 2 Apportionment Factors are determined as part of the Company's annual tax return for that jurisdiction.

Note 1: The taxes assessed on each operating company can differ from year to year and between operating companies by both the type of taxes and the states in which they were assessed. Therefore, for each company, the types and jurisdictions of tax expense recorded on this page could differ from the same page in the same company's prior year template or from this page in other operating companies' current year templates. For each update, this sheet will be revised to ensure that the total activity recorded hereon equals the total reported in account 408.1 on P. 114, Ln 14 of the FERC Form 1.

Project Totals

This is the calculation of additional incentive revenue on projects deemed by the FERC to be eligible for an incentive return. This additional incentive requirement is applicable for the life of this specific project. Each year the revenue requirement calculated for PJM should be incremented by the amount of the incentive revenue calculated for that year on this project.

In order to calculate the proper monthly RTEP billing amount, PJM requires a 12 month revenue requirement for each RTEP project. As a result, notwithstanding the fact that the project was in service for a partial year, the project revenue requirement in the year that the project goes into service has been annualized (shown at the full-year level) so that PJM will collect the correct monthly billings.

Cost of Service Formula Rate Using Historic Year FF1 Balances

Worksheet N - Gains (Losses) on Sales of Plant Held For Future Use

Note: Gain or loss on plant held for future are recorded in accounts 411.6 or 411.7 respectively. Sales will be functionalized based on the description of that asset. Sales of transmission assets will be direct assigned; sales of general assets will be functionalized on labor. Sales of plant held for future use related to generation or distribution will not be included in the formula.

GENERAL NOTES:

The rates for each AEP company have been approved by their respective regulatory commissions.

APCo falls under the authority of Virginia, West Virginia and the FERC. Therefore, APCo's rates are a composite of the jurisdictions under which it operates. Each jurisdictions' rate is multiplied by an allocation factor, and the product for each jurisdiction is added with the other jurisdictions to derive the composite rate for the company.

- (1) As approved in Indiana Case No. 43231.
- (2) As approved in Michigan Case No. U16801.
- (3) FERC wholesale formula rate agreements specify that the depreciation rates in the formula rates change upon approval of MPSC rates in the Michigan jurisdiction.
- (4) The rates approved for each jurisdiction are updated when approved by that commission. These demand-based allocation factors for all jurisdictions are updated when new rates are approved in one of the jurisdictions. These allocation factors reflect I&M's 12 monthly Coincident Peaks during test year of the most recent rate case.

GENERAL NOTES:

The rates for each AEP company have been approved by their respective regulatory commissions.

I&M falls under the authority of Indiana, Michigan and the FERC. Therefore, I&M's rates are a composite of the jurisdictions under which it operates. Each jurisdictions' rate is multiplied by an allocation factor, and the product for each jurisdiction is added with the other jurisdictions to derive the composite rate for the company.

Effective State Tax Rate	0.00%
State #4 Tax Rate	
Apportionment Factor - Note 2	
Effective State Tax Rate	0.00%
Total Effective State Income Tax Rate	0.00%

The Ohio State Income Tax is being phased-out pro rata over a 5 year period from 2005 through 2009. The taxable portion of income is 20% in 2009. The phase-out factors can be found in the Ohio Revised Code at 5733.01(G)2(a)(v). This tax has been replaced with a Commercial Activities Tax that is included in Schedule H and H-1.

Note 2 Apportionment Factors are determined as part of the Company's annual tax return for that jurisdiction.

	(Total Company Amount Ties to FFI p.114, Ln 14,(c))			

Note 1: The taxes assessed on each operating company can differ from year to year and between operating companies by both the type of taxes and the states in which they were assessed. Therefore, for each company, the types and jurisdictions of tax expense recorded on this page could differ from the same page in the same company's prior year template or from this page in other operating companies' current year templates. For each update, this sheet will be revised to ensure that the total activity recorded hereon equals the total reported in account 408.1 on P. 114, Ln 14 of the FERC Form 1.

Cost of Service Formula Rate Using Historic Year FF1 Balances

Worksheet J Supporting Calculation of PROJECTED PJM RTEP Project Revenue Requirement Billed to Benefiting Zones COMPANY NAME HERE

I. Calculate Return and Income Taxes with basis point ROE increase for Projects Qualified for Regional Billing.

ROE w/o incentives (Projected TCOS, In 164) 0.00% <==ROE Adder Cannot Exceed 125 Basis Points Project ROE Incentive Adder

ROE with additional basis point incentive 0.00% <== ROE Including Incentives Cannot Exceed 12.74% Until July 1, 2012

Determine R (cost of long term debt, cost of preferred stock and equity percentage is from the Projected TCOS, Ins 162 through 164)

	<u>%</u>	<u>Cost</u>	<u>V</u>	Veighted cost
Long Term Debt	0.00%	0.00%		0.000%
Preferred Stock	0.00%	0.00%		0.000%
Common Stock	0.00%	0.00%		0.000%
		F	₹ =	0.000%

B. Determine Return using 'R' with hypothetical basis point ROE increase for Identified Projects.

Rate Base (Projected TCOS, In 78) R (from A. above) 0.000% Return (Rate Base x R)

C. Determine Income Taxes using Return with hypothetical basis point ROE increase for Identified Projects.

Return (from B. above) Effective Tax Rate (Projected TCOS, In 126) 0.00% Income Tax Calculation (Return x CIT) ITC Adjustment Income Taxes

Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical basis point ROE increase.

A. Determine Annual Revenue Requirement less return and Income Taxes.

Annual Revenue Requirement (Projected TCOS, In 1) T.E.A. & Lease Payments (Projected TCOS, Lns 105 & 106) Return (Projected TCOS, In 134) Income Taxes (Projected TCOS, In 133) Annual Revenue Requirement, Less TEA Charges, Return and Taxes

B. Determine Annual Revenue Requirement with hypothetical basis point increase in ROE.

Annual Revenue Requirement, Less TEA Charges, Return and Taxes Return (from I.B. above) Income Taxes (from I.C. above) Annual Revenue Requirement, with Basis Point ROE increase Depreciation (Projected TCOS, In 111) Annual Rev. Reg. w/ Basis Point ROE increase, less Depreciation

C. Determine FCR with hypothetical basis point ROE increase.

Annual Revenue Requirement, with Basis Point ROE increase FCR with Basis Point increase in ROE

Annual Rev. Reg, w / Basis Point ROE increase, less Dep.

Net Transmission Plant (Projected TCOS, In 48)

FCR with Basis Point ROE increase, less Depreciation 0.00% FCR less Depreciation (Projected TCOS, In 9) 0.00% Incremental FCR with Basis Point ROE increase, less Depreciation 0.00%

Year

Project Totals

This is the calculation of additional incentive revenue on projects deemed by the FERC to be eligible for an incentive return. This additional incentive requirement is applicable for the life of this specific project. Each year the revenue requirement calculated for PJM should be incremented by the amount of the incentive revenue calculated for that year on this project.

In order to calculate the proper monthly RTEP billing amount, PJM requires a 12 month revenue requirement for each RTEP project. As a result, notwithstanding the fact that the project was in service for a partial year, the project revenue requirement in the year that the project goes into service has been annualized (shown at the full-year level) so that PJM will collect the correct monthly billings.

Worksheet N - Gains (Losses) on Sales of Plant Held For Future Use

Note: Gain or loss on plant held for future are recorded in accounts 411.6 or 411.7 respectively. Sales will be functionalized based on the description of that asset. Sales of transmission assets will be direct assigned; sales of general assets will be functionalized on labor. Sales of plant held for future use related to generation or distribution will not be included in the formula.

GENERAL NOTES:

The rates for each AEP company have been approved by their respective regulatory commissions.

APCo falls under the authority of Virginia, West Virginia and the FERC. Therefore, APCo's rates are a composite of the jurisdictions under which it operates. Each jurisdictions' rate is multiplied by an allocation factor, and the product for each jurisdiction is added with the other jurisdictions to derive the composite rate for the company.

Per the terms of the settlement in this case, AEP will make a 205 filing whenever a company's rates are changed by their commission(s), or if the methodology to calculate the jurisdictional allocator in multiple-state companies changes. Changes in the allocation factors will not necessitate a 205 filing.

COMP

²⁰⁰⁹ Allocation factors based on APCo's 12 monthly Coincident Peaks for twelve months ended September 30, 2008 as provided by AEPSC Regulated Pricing. The demand allocation factors are updated annually as of January 1, based on the 12 monthly CP's as of the previous September 30th.

- (1) As approved in Indiana Case No. 43231.
- (2) As approved in Michigan Case No. U16801.
- (3) FERC wholesale formula rate agreements specify that the depreciation rates in the formula rates change upon approval of MPSC rates in the Michigan jurisdiction.
- (4) The rates approved for each jurisdiction are updated when approved by that commission. These demand-based allocation factors for all jurisdictions are updated when new rates are approved in one of the jurisdictions. These allocation factors reflect I&M's 12 monthly Coincident Peaks during test year of the most recent rate case.

GENERAL NOTES:

The rates for each AEP company have been approved by their respective regulatory commissions.

I&M falls under the authority of Indiana, Michigan and the FERC. Therefore, I&M's rates are a composite of the jurisdictions under which it operates. Each jurisdictions' rate is multiplied by an allocation factor, and the product for each jurisdiction is added with the other jurisdictions to derive the composite rate for the company.
