AEP - SPP Formula Rate Schedule 11 Revenue Requirements Southwestern Electric Power Company Page: 5 of 69

AEP Transmission Formula Rate Template

Calculation of Schedule 11 Revenue Requirements For AEP Transmission Projects For Calendar Year 2014 and Projected Year 2015

AEP Schedule 11 Revenue Requirement Including True-Up of Prior Collections

SOUTHWESTERN ELECTRIC POWER COMPANY

Note: Some project's final trued-up cost may not meet SPP's \$100,000 threshold for socialization. In that case a true-up of the pirior year ARR will be made in columns (H) through (O), but no projected ARR will be shown in columns (E) through (G) for the current year.

Historical Combined Load Worksheet (SPP Zone - 1)

Notes:

(1) MW, at the time of the AEP-SPP Internal (MLR) Peak

(2) At the generator, includes transmission losses.

(3) At the generator. Transmission losses added to metered values which include appropriate dist.& xfmr losses.

(4) Not self-generated

(5) VEMCO and its resources purchased by SWEPCO Oct. 1, 2010. VEMCO load included in SWEPCO Native starting Oct 1, 2010.

(6) SPP export from SWEPCO's SPP fleet to VEMCO (CLECO) commenced May 2011 - Replacement of terminated SPA Hydro resource.

#### PUBLIC SERVICE COMPANY OF OKLAHOMA

#### Letter

#### <u>Notes</u>

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

- b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting work papers rather than using the allocations above.
- A The revenue credits shall include a) amounts received directly from the SPP for PTP transmission services, b) direct assignment charges for transmission facilities, the cost of which has been included in the TCOS, and c) amounts from customers taking service under grandfathered agreements, where the demand is not included in the rate divisor. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the TCOS are not included as revenue credits. Revenue from Transmission Customers whose coincident peak loads are included in the DIVISOR of the load-ratio share calculation are not included as revenue credits. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 1 are used to compute the revenue requirement for facilities and any upgrades.
- C This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet G shows the calculation of the projected revenue requirement for each project, based on an FCR rate caclulated from inputs on the Historic TCOS. Line 15 shows the incremental ARR for projects receiving incentives as accepted by FERC. These individual additional revenue requirements are summed for the true-up year, and included here.
- D The gross plant, accumulated depreciation, and deferred tax balances included in rate base are reduced by the removal of balances related to Asset Retirement Obligations (AROs). This is to comply with the requirements of FERC Rulemaking RM02-7-000.
- The total-company balances shown for Accounts 281, 282, 283, 190 only reflect ADIT that relates to utility operations.
   The balance of Account 255 is reduced by prior flow throughs and is completely excluded if the utility chose to utilize amortization of tax credits against FIT expense as discussed in Note N. An exception to this is pre-1971 ITC balances, which are required to be taken as an offset to rate base. Account 281 is not allocated. Transmission allocations are shown on Worksheet B.
- F Identified as being transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 80.
- H Consistent with Paragraph 657 of Order 2003-A, the amount on line is equal to the balance of IPP System Upgrade Credits owed to transmission customers that made contributions toward the construction of System upgrades, and includes accrued interest and unreturned balance of contributions. The annual interest expense is included on line 119.
- I Removes the expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- J Removes cost of transmission service provided by others to the extent such service is not incurred to provide the SPP service at issue.
- K General Plant and Administrative & General expenses may be functionalized based on allocators other then the W/S allocator. Full documentation must be provided.
- L Expense reported for these A&G accounts will be included in the cost of service only to the extent they are directly assignable to transmission service. Worksheet D allocates these expense items. Acct 928 Includes Regulatory Commission expenses itemized in FERC Form-1 at page 351, column H. FERC Assessment Fees and Annual Charges

shall not be allocated to transmission. Only safety-related and educational advertising costs in Account 930.1 are included in the TCOS. Account 930.2 includes the expenses incurred by the transmission function for Associated Business Development revenues given as a credit to the TCOS on Worksheet E.

Μ

This line complies with FERC requirement that Other Post Employment Benefits remain constant from an initial test year. Changes in this base amount can only occur via approval of a 205 filing.

Ν

0

Includes only FICA, unemployment, property and other assessments charged in the current year. Gross Receipts tax, Sales & Use taxes, and taxes related to income are excluded.

- P Effective January 1, 2007, Texas instituted a gross margin tax. This tax is calculated on the Texas allocated revenue of the Company, reduced by 30% to derive a "Gross Margin" for the Company. The tax rate of one percent is assessed on the resulting amount. The jurisdictional allocator is based on transmission demand allocators.
- Q Removes plant excluded from the OATT because it does not meet the SPP's definition of Transmission Facilities or is otherwise ineligible to be recovered under the OATT.
- R Removes transmission plant (e.g. step-up transformers) included in the development of OATT ancillary service rates and not already removed for reasons indicated in Note Q.
- S Includes functional wages & salaries incurred by parent company service corporation for support of the operating company.
- Long Term Debt cost rate = long-term interest (ln 138) / long term debt (ln 147). Preferred Stock cost rate = preferred dividends (ln 139) / preferred outstanding (ln 148).
   Common Stock cost rate (ROE) = 11.2%, the rate accepted by FERC in Docket No. ER07-XXX. It includes an additional 50 basis points for remaining a member of the SPP RTO.
- U Per Settlement, equity is limited to 52.5% of PSO's Capital Structure. If the percentage of equity exceeds the cap, the excess is included in long term debt in the cap structure. This value cannot change prior to 2/1/11. After this date it can only be changed via an approved 205 or 206 filing.

Letter

#### <u>Notes</u>

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

- b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting work papers rather than using the allocations above.
- A The revenue credits shall include a) amounts received directly from the SPP for PTP transmission services, b) direct assignment charges for transmission facilities, the cost of which has been included in the TCOS, and c) amounts from customers taking service under grandfathered agreements, where the demand is not included in the rate divisor. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the TCOS are not included as revenue credits. Revenue from Transmission Customers whose coincident peak loads are included in the DIVISOR of the load-ratio share calculation are not included as revenue credits. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 1 are used to compute the revenue requirement for facilities and any upgrades.
- C This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet G shows the calculation of the projected revenue requirement for each project, based on an FCR rate caclulated from inputs on this TCOS. Line 166 shows the incremental ARR for projects receiving incentives as accepted by FERC. These individual additional revenue requirements are summed for the true-up year, and included here.
- D The gross plant, accumulated depreciation, and deferred tax balances included in rate base are reduced by the removal of balances related to Asset Retirement Obligations (AROs). This is to comply with the requirements of FERC Rulemaking RM02-7-000.
- The total-company balances shown for Accounts 281, 282, 283, 190 only reflect ADIT that relates to utility operations.
   The balance of Account 255 is reduced by prior flow throughs and is completely excluded if the utility chose to utilize amortization of tax credits against FIT expense as discussed in Note N. An exception to this is pre-1971 ITC balances, which are required to be taken as an offset to rate base. Account 281 is not allocated. Transmission allocations are shown on Worksheet B.
- F Identified as being transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 231.
- H Consistent with Paragraph 657 of Order 2003-A, the amount on line is equal to the balance of IPP System Upgrade Credits owed to transmission customers that made contributions toward the construction of System upgrades, and includes accrued interest and unreturned balance of contributions. The annual interest expense is included on line 270.
- I Removes the expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- J Removes cost of transmission service provided by others to the extent such service is not incurred to provide the SPP service at issue.
- K General Plant and Administrative & General expenses may be functionalized based on allocators other then the W/S allocator. Full documentation must be provided.
- L Expense reported for these A&G accounts will be included in the cost of service only to the extent they are directly assignable to transmission service. Worksheet D allocates these expense items. Acct 928 Includes Regulatory Commission expenses itemized in FERC Form-1 at page 351, column H. FERC Assessment Fees and Annual Charges shall not be allocated to transmission. Only safety-related and educational advertising costs in Account 930.1 are included in the TCOS. Account 930.2 includes the expenses incurred by the transmission function for Associated Business Development revenues given as a credit to the TCOS on Worksheet E.
- M This line complies with FERC requirement that Other Post Employment Benefits remain constant from an initial test year. Changes in this base amount can only occur via approval of a 205 filing.
- Ν

Includes only FICA, unemployment, property and other assessments charged in the current year. Gross Receipts tax, Sales & Use taxes, and taxes related to income are excluded.

- P Effective January 1, 2007, Texas instituted a gross margin tax. This tax is calculated on the Texas allocated revenue of the Company, reduced by 30% to derive a "Gross Margin" for the Company. The tax rate of one percent is assessed on the resulting amount. The jurisdictional allocator is based on transmission demand allocators.
- Q Removes plant excluded from the OATT because it does not meet the SPP's definition of Transmission Facilities or is otherwise ineligible to be recovered under the OATT.

p =

- R Removes transmission plant (e.g. step-up transformers) included in the development of OATT ancillary service rates and not already removed for reasons indicated in Note Q.
- S Includes functional wages & salaries incurred by parent company service corporation for support of the operating company.
- Long Term Debt cost rate = long-term interest (ln 289) / long term debt (ln 298). Preferred Stock cost rate = preferred dividends (ln 290) / preferred outstanding (ln 299).
   Common Stock cost rate (ROE) = 11.2%, the rate accepted by FERC in Docket No. ER07-XXX. It includes an additional 50 basis points for remaining a member of the SPP RTO.
- U Per Settlement, equity is limited to 52.5% of PSO's Capital Structure. If the percentage of equity exceeds the cap, the excess is included in long term debt in the cap structure. This value cannot change prior to 2/1/11. After this date it can only be changed via an approved 205 or 206 filing.

0.00%

#### PUBLIC SERVICE COMPANY OF OKLAHOMA

Letter

#### <u>Notes</u>

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting work papers rather than using the allocations above.

- A The revenue credits shall include a) amounts received directly from the SPP for PTP transmission services, b) direct assignment charges for transmission facilities, the cost of which has been included in the TCOS, and c) amounts from customers taking service under grandfathered agreements, where the demand is not included in the rate divisor. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the TCOS are not included as revenue credits. Revenue from Transmission Customers whose coincident peak loads are included in the DIVISOR of the load-ratio share calculation are not included as revenue credits. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 1 are used to compute the revenue requirement for facilities and any upgrades.
- C This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet G shows the calculation of the trued-up revenue requirement for each project, based on an FCR rate caclulated from inputs on this TCOS. Line 15 shows the incremental ARR for projects receiving incentives as accepted by FERC. These individual additional revenue requirements are summed for the true-up year, and included here.
- D The gross plant, accumulated depreciation, and deferred tax balances included in rate base are reduced by the removal of balances related to Asset Retirement Obligations (AROs). This is to comply with the requirements of FERC Rulemaking RM02-7-000.
- E The total-company balances shown for Accounts 281, 282, 283, 190 only reflect ADIT that relates to utility operations. The balance of Account 255 is reduced by prior flow throughs and is completely excluded if the utility chose to utilize amortization of tax credits against FIT expense as discussed in Note N. An exception to this is pre-1971 ITC balances, which are required to be taken as an offset to rate base. Account 281 is not allocated. Transmission allocations are shown on Worksheet C.
- F Identified as being transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 68.
- H Consistent with Paragraph 657 of Order 2003-A, the amount on line is equal to the balance of IPP System Upgrade Credits owed to transmission customers that made contributions toward the construction of System upgrades, and includes accrued interest and unreturned balance of contributions. The annual interest expense is included on line 106.
- I Removes the expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- J Removes cost of transmission service provided by others to the extent such service is not incurred to provide the SPP service at issue.
- K General Plant and Administrative & General expenses may be functionalized based on allocators other then the W/S allocator. Full documentation must be provided.
- L Expense reported for these A&G accounts will be included in the cost of service only to the extent they are directly assignable to transmission service. Worksheet D allocates these expense items. Acct 928 Includes Regulatory Commission expenses itemized in FERC Form-1 at page 351, column H. FERC Assessment Fees and Annual Charges

shall not be allocated to transmission. Only safety-related and educational advertising costs in Account 930.1 are included in the TCOS. Account 930.2 includes the expenses incurred by the transmission function for Associated Business Development revenues given as a credit to the TCOS on Worksheet E.

М

This line complies with FERC requirement that Other Post Employment Benefits remain constant from an initial test year. Changes in this base amount can only occur via approval of a 205 filing.

Ν

0

Includes only FICA, unemployment, property and other assessments charged in the current year. Gross Receipts tax, Sales & Use taxes, and taxes related to income are excluded.

- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p ="the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) (In 96) multiplied by (1/1-T). If the applicable tax rates are zero enter 0. Inputs Required: FIT = 35.00% SIT = 5.48% (State Income Tax Rate or Composite SIT. Worksheet K) 0.00% (percent of federal income tax deductible for state purposes)
- P Effective January 1, 2007, Texas instituted a gross margin tax. This tax is calculated on the Texas allocated revenue of the Company, reduced by 30% to derive a "Gross Margin" for the Company. The tax rate of one percent is assessed on the resulting amount. The jurisdictional allocator is based on transmission demand allocators.
- Q Removes plant excluded from the OATT because it does not meet the SPP's definition of Transmission Facilities or is otherwise ineligible to be recovered under the OATT.
- R Removes transmission plant (e.g. step-up transformers) included in the development of OATT ancillary service rates and not already removed for reasons indicated in Note Q.
- S Includes functional wages & salaries incurred by parent company service corporation for support of the operating company.
- Long Term Debt cost rate = long-term interest (ln 125) / long term debt (ln 134). Preferred Stock cost rate = preferred dividends (ln 126) / preferred outstanding (ln 135).
   Common Stock cost rate (ROE) = 11.2%, the rate accepted by FERC in Docket No. ER07-XXX. It includes an additional 50 basis points for remaining a member of the SPP RTO.
- U Per Settlement, equity is limited to 52.5% of PSO's Capital Structure. If the percentage of equity exceeds the cap, the excess is included in long term debt in the cap structure. This value cannot change prior to 2/1/11. After this date it can only be changed via an approved 205 or 206 filing.

4 5 6	Other Adjustments (company records) Accounting Adjustment	-
7	Net Funds from IPP Customers 12/31/2014 (2014 FORM 1, P269, (F))	1,090,569
8	Average Balance for 2014 ((In 1 + In 7)/2)	2,053,875

AEP West SPP Member Companies 2015 Cost of Service Formula Rate Projected on 2014 FF1 Balances Worksheet F - Calculation of PROJECTED Annual Revenue Requirement for BPU and Special-billed Projects Based on a Carrying Charge Derived from Historic 2014 Data PUBLIC SERVICE COMPANY OF OKLAHOMA

#### Calculate Return and Income Taxes with 0 basis point ROE increase for Projects Qualified I.

A. Determine 'R' with hypothetical 0 basis point increase in ROE for Identified Projects

ROE w/o incentives (Projected	TCOS, In 149)		11.20%	
Project ROE Incentive Adder (E	0	basis points		
ROE with additional 0 basis point	11.20%	<==Incentive RO		
Determine R (cost of long term	debt, cost of pret	ferred stock and percent is	s from Projected TCOS,	, Ins 147 through ²
	<u>%</u>	<u>Cost</u>	Weighted cost	
Long Term Debt	50.50%	0.0517	0.0261	
Preferred Stock	0.00%	0.0000	0.0000	
Common Stock	49.50%	0.1120	<u>0.0554</u>	
		R =	0.0815	

B. Determine Return using 'R' with hypothetical 0 basis point ROE increase for Identified Projects.

Rate Base (Projected TCOS, In 75)	429,462,468
R (from A. above)	0.0815
Return (Rate Base x R)	35,020,875

C. Determine Income Taxes using Return with hypothetical 0 basis point ROE increase for Identified Projects.

Return (from B. above)	35,020,875
Tax Rate (Projected TCOS, In 109)	38.56%
EIT=(T/(1-T)) * (1-(WCLTD/WACC)) =	42.68%
Income Tax Calculation (Return x EIT)	14,945,325
ITC Adjustment (Projected TCOS, In 116)	(266,733)
Income Taxes	14,678,592

#### II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 0 basis point ROE increase.

A. Determine Net Revenue Requirement less return and Income Taxes.

Net Revenue Requirement (Projected TCOS, In 123)	91,879,619
Return (Projected TCOS, In 118)	35,020,875
Income Taxes (Projected TCOS, In 117)	14,678,592
Gross Margin Taxes (Projected TCOS, In 122)	
Net Revenue Requirement, Less Return and Taxes	42,180,152

#### B. Determine Net Revenue Requirement with hypothetical 0 basis point increase in ROE.

Net Revenue Requirement, Less Return and Taxes	42,180,152
Return (from I.B. above)	35,020,875
Income Taxes (from I.C. above)	14,678,592
Net Revenue Requirement, with 0 Basis Point ROE increase	91,879,619
Gross Margin Tax with Basis Point ROE Increase (II C. below)	-
Revenue Requirement w/ Gross Margin Taxes	91,879,619
Less: Depreciation (Projected TCOS, In 95)	13,609,704
Net Rev. Req, w/0 Basis Point ROE increase, less Depreciation	78,269,915

## C. Determine Gross Margin Tax with hypothetical 0 basis point increase in ROE.

Net Revenue Requirement before Gross Margin Taxes, with 0	91,879,619
Basis Point ROE increase (II B. above)	
Apportionment Factor to Texas (Worksheet K, In 12)	0.00%
Apportioned Texas Revenues	-
Taxable Percentage of Revenue (70%)	70%
Taxable, Apportioned Margin	-
Texas Gross Margin Tax Rate	1%
Texas Gross Margin Tax Expense	-
Gross-up Required for Gross Margin Tax Expense	
Total Additional Gross Margin Tax Revenue Requirement	-

#### D. Determine FCR with hypothetical 0 basis point ROE increase.

Net Transmission Plant (Projected TCOS, Ins 46, 47, 48, 49, 51)	567,701,276
Net Revenue Requirement, with 0 Basis Point ROE increase	91,879,619
FCR with 0 Basis Point increase in ROE	16.18%
Net Rev. Req, w / 0 Basis Point ROE increase, less Dep. FCR with 0 Basis Point ROE increase, less Depreciation FCR less Depreciation (Projected TCOS, In 12)	78,269,915 13.79% <u>13.79%</u> 0.00%

#### Incremental FCR with 0 Basis Point ROE increase, less Depreciation III. Calculation of Composite Depreciation Rate

Transmission Plant @ Beginning of Period (P.206, In 58)	731,312,125	<==From Input or

on Worksheet B on Worksheet B

#### Calculate Return and Income Taxes with 0 basis point ROE increase for Projects Qualified for Incentive. I.

#### A. Determine 'R' with hypothetical 0 basis point increase in ROE for Identified Projects

ROE w/o incentives (True-L	In TCOS In 136)		11.20%	
Project ROE Incentive Adde	,	umber)	0 basis points	
ROE with additional 0 basis	point incentive		11.20% <==Incentive ROE Cannot Ex	ce
Determine R (cost of long te	erm debt, cost of pre	eferred stock and perce	ent is from True-Up TCOS, Ins 134 through 136)	
	<u>%</u>	<u>Cost</u>	Weighted cost	
Long Term Debt	51.09%	0.0529	0.0270	
Preferred Stock	0.00%	0.0000	0.0000	
Common Stock	48.91%	0.1120	<u>0.0548</u>	
		R =	= 0.0818	

B. Determine Return using 'R' with hypothetical 0 basis point ROE increase for Identified Projects.

Rate Base (True-Up TCOS, In 63)	380,020,732
R (from A. above)	0.0818
Return (Rate Base x R)	31,085,619

C. Determine Income Taxes using Return with hypothetical 0 basis point ROE increase for Identified Projects.

Return (from B. above)	31,085,619
Tax Rate (True-Up TCOS, In 106)	38.56%
EIT=(T/(1-T)) * (1-(WCLTD/WACC)) =	42.04%
Income Tax Calculation (Return x EIT)	13,066,968
ITC Adjustment (True-Up TCOS, In 103)	(257,590)
Income Taxes	12,809,378

## II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 0 basis point ROE increase.

#### A. Determine Net Revenue Requirement less return and Income Taxes.

Net Revenue Requirement (True-Up TCOS, In 110)	85,485,207
Return (True-Up TCOS, In 105)	31,085,619
Income Taxes (True-Up TCOS, In 104)	12,809,378
Gross Margin Taxes (True-Up TCOS, In 109)	
Net Revenue Requirement, Less Return and Taxes	41,590,211

#### B. Determine Net Revenue Requirement with hypothetical 0 basis point increase in ROE.

Net Revenue Requirement, Less Return and Taxes	41,590,211
Return (from I.B. above)	31,085,619
Income Taxes (from I.C. above)	12,809,378
Net Revenue Requirement, with 0 Basis Point ROE increase	85,485,207
Gross Margin Tax with Basis Point ROE Increase (II C. below)	-
Revenue Requirement w/ Gross Margin Taxes	85,485,207
Less: Depreciation (True-Up TCOS, In 83)	13,535,929
Net Rev. Req, w/0 Basis Point ROE increase, less Depreciation	71,949,279

#### C. Determine Gross Margin Tax with hypothetical 0.112 basis point increase in ROE. Net Revenue Requirement before Gross Margin Taxes, with 0 85,485,207

#### AEP West SPP Member Companies Cost of Service Formula Rate Using 2014 FF1 Balances Worksheet K - Development of Composite State Income Tax Rate PUBLIC SERVICE COMPANY OF OKLAHOMA

## I. DEVELOPMENT OF COMPOSITE STATE INCOME TAX RATES FOR 2014

Note 1 --- The Oklahoma State Income Tax Rate of 6% is reduced to 5.66% due to the deductibility of Oklahoma State Income Taxes on the Oklahoma State Income Tax Return.

Note 2 --- The Ohio State Income Tax is being phased-out over a 5 year period and is being replaced with a Commercial Activites Tax. The taxable portion of income is 40% in 2007.

AEP West SPP Member Companies 2015 Transmission Cost of Service Formula Rate Utilizing Historic Cost Data for 2014 and Projected Net Plant at Year-End 2015

#### SOUTHWESTERN ELECTRIC POWER COMPANY

#### <u>Letter</u>

#### <u>Notes</u>

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

- b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting workpapers rather than using the allocations above.
- A The revenue credits shall include a) amounts received directly from the SPP for PTP transmission services, b) direct assignment charges for transmission facilities, the cost of which has been included in the TCOS, and c) amounts from customers taking service under grandfathered agreements, where the demand is not included in the rate divisor. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the TCOS are not included as revenue credits. Revenue from Transmission Customers whose coincident peak loads are included in the DIVISOR of the load-ratio share calculation are not included as revenue credits. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 1 are used to compute the revenue requirement for facilities and any upgrades.
- C This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet G shows the calculation of the projected revenue requirement for each project, based on an FCR rate caclulated from inputs on the Historic TCOS. Line 15 shows the incremental ARR for projects receiving incentives as accepted by FERC. These individual additional revenue requirements are summed for the true-up year, and included here.
- D The gross plant, accumulated depreciation, and deferred tax balances included in rate base are reduced by the removal of balances related to Asset Retirement Obligations (AROs). This is to comply with the requirements of FERC Rulemaking RM02-7-000.
- E The total-company balances shown for Accounts 281, 282, 283, 190 only reflect ADIT that relates to utility operations. The balance of Account 255 is reduced by prior flow throughs and is completely excluded if the utility chose to utilize amortization of tax credits against FIT expense as discussed in Note N. An exception to this is pre-1971 ITC balances, which are required to be taken as an offset to rate base. Account 281 is not allocated. Transmission allocations are shown on Worksheet B.
- F Identified as being transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 80.
- H Consistent with Paragraph 657 of Order 2003-A, the amount on line is equal to the balance of IPP System Upgrade Credits owed to transmission customers that made contributions toward the construction of System upgrades, and includes accrued interest and unreturned balance of contributions. The annual interest expense is included on line 119.
- Removes the expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- J Removes cost of transmission service provided by others to the extent such service is not incurred to provide the SPP service at issue.
- K General Plant and Administrative & General expenses may be functionalized based on allocators other then the W/S allocator. Full documentation must be provided.
- L Expense reported for these A&G accounts will be included in the cost of service only to the extent they are directly assignable to transmission service. Worksheet D allocates these expense items. Acct 928 Includes Regulatory Commission expenses itemized in FERC Form-1 at page 351, column H. FERC Assessment Fees and Annual Charges shall not be allocated to transmission. Only safety-related and educational advertising costs in Account 930.1 are included in the TCOS. Account 930.2 includes the

expenses incurred by the transmission function for Associated Business Development revenues given as a credit to the TCOS on Worksheet E.

Μ

This line complies with FERC requirement that Other Post Employment Benefits remain constant from an initial test year. Changes in this base amount can only occur via approval of a 205 filing.

Ν

0

Includes only FICA, unemployment, property and other assessments charged in the current year. Gross Receipts tax, Sales & Use taxes, and taxes related to income are excluded.

- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p ="the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) (In 109) multiplied by (1/1-T). If the applicable tax rates are zero enter 0. Inputs Required: FIT = 35.00% SIT= 4.75% (State Income Tax Rate or Composite SIT. Worksheet K)) p = 0.000% (percent of federal income tax deductible for state purposes)
- P Effective January 1, 2007, Texas instituted a gross margin tax. This tax is calculated on the Texas allocated revenue of the Company, reduced by 30% to derive a "Gross Margin" for the Company. The tax rate of one percent is assessed on the resulting amount. The jurisdictional allocator is based on transmission demand allocators.
- Q Removes plant excluded from the OATT because it does not meet the SPP's definition of Transmission Facilities or is otherwise ineligible to be recovered under the OATT.
- R Removes transmission plant (e.g. step-up transformers) included in the development of OATT ancillary service rates and not already removed for reasons indicated in Note Q.
- S Includes functional wages & salaries incurred by parent company service corporation for support of the operating company.
- Long Term Debt cost rate = long-term interest (ln 138) / long term debt (ln 147). Preferred Stock cost rate = preferred dividends (ln 139) / preferred outstanding (ln 148).
   Common Stock cost rate (ROE) = 11.2%, the rate accepted by FERC in Docket No. ER07-XXX. It includes an additional 50 basis points for remaining a member of the SPP RTO.
- U Per Settlement, equity is limited to 52.5% of PSO's Capital Structure. If the percentage of equity exceeds the cap, the excess is included in long term debt in the cap structure. This value cannot change prior to 2/1/11. After this date it can only be changed via an approved 205 or 206 filing.

AEP - SPP Formula Rate SWEPCO TCOS - Historic Page: 48 of 69

AEP West SPP Member Companies Transmission Cost of Service Formula Rate Utilizing Historic Cost Data for 2014 with Year-End Rate Base Balances

#### SOUTHWESTERN ELECTRIC POWER COMPANY

Letter

#### <u>Notes</u>

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

- b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting workpapers rather than using the allocations above.
- A The revenue credits shall include a) amounts received directly from the SPP for PTP transmission services, b) direct assignment charges for transmission facilities, the cost of which has been included in the TCOS, and c) amounts from customers taking service under grandfathered agreements, where the demand is not included in the rate divisor. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the TCOS are not included as revenue credits. Revenue from Transmission Customers whose coincident peak loads are included in the DIVISOR of the load-ratio share calculation are not included as revenue credits. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 1 are used to compute the revenue requirement for facilities and any upgrades.
- C This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet G shows the calculation of the projected revenue requirement for each project, based on an FCR rate calculated from inputs on this TCOS. Line 166 shows the incremental ARR for projects receiving incentives as accepted by FERC. These individual additional revenue requirements are summed for the true-up year, and included here.
- D The gross plant, accumulated depreciation, and deferred tax balances included in rate base are reduced by the removal of balances related to Asset Retirement Obligations (AROs). This is to comply with the requirements of FERC Rulemaking RM02-7-000.
- E The total-company balances shown for Accounts 281, 282, 283, 190 only reflect ADIT that relates to utility operations. The balance of Account 255 is reduced by prior flow throughs and is completely excluded if the utility chose to utilize amortization of tax credits against FIT expense as discussed in Note N. An exception to this is pre-1971 ITC balances, which are required to be taken as an offset to rate base. Account 281 is not allocated. Transmission allocations are shown on Worksheet B.
- F Identified as being transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 231.
- H Consistent with Paragraph 657 of Order 2003-A, the amount on line is equal to the balance of IPP System Upgrade Credits owed to transmission customers that made contributions toward the construction of System upgrades, and includes accrued interest and unreturned balance of contributions. The annual interest expense is included on line 270.
- Removes the expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- J Removes cost of transmission service provided by others to the extent such service is not incurred to provide the SPP service at issue.
- K General Plant and Administrative & General expenses may be functionalized based on allocators other then the W/S allocator. Full documentation must be provided.
- L Expense reported for these A&G accounts will be included in the cost of service only to the extent they are directly assignable to transmission service. Worksheet D allocates these expense items. Acct 928 Includes Regulatory Commission expenses itemized in FERC Form-1 at page 351, column H. FERC Assessment Fees and Annual Charges shall not be allocated to transmission. Only safety-related and educational advertising costs in Account 930.1 are included in the TCOS. Account 930.2 includes the expenses incurred by the transmission function for Associated Business Development revenues given as a credit to the TCOS on Worksheet E.
- M This line complies with FERC requirement that Other Post Employment Benefits remain constant from an initial test year. Changes in this base amount can only occur via approval of a 205 filing.
- Ν

Includes only FICA, unemployment, property and other assessments charged in the current year. Gross Receipts tax, Sales & Use taxes, and taxes related to income are excluded.

- Ο The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) (In 260) multiplied by (1/1-T). If the applicable tax rates are zero enter 0. Inputs Required: FIT = 35.00% SIT= 4.75% (State Income Tax Rate or Composite SIT. Worksheet K) 0.00% (percent of federal income tax deductible for state purposes) p =
- P Effective January 1, 2007, Texas instituted a gross margin tax. This tax is calculated on the Texas allocated revenue of the Company, reduced by 30% to derive a "Gross Margin" for the Company. The tax rate of one percent is assessed on the resulting amount. The jurisdictional allocator is based on transmission demand allocators.
- Q Removes plant excluded from the OATT because it does not meet the SPP's definition of Transmission Facilities or is otherwise ineligible to be recovered under the OATT.
- R Removes transmission plant (e.g. step-up transformers) included in the development of OATT ancillary service rates and not already removed for reasons indicated in Note Q.
- S Includes functional wages & salaries incurred by parent company service corporation for support of the operating company.
- Long Term Debt cost rate = long-term interest (ln 289) / long term debt (ln 298). Preferred Stock cost rate = preferred dividends (ln 290) / preferred outstanding (ln 299).
   Common Stock cost rate (ROE) = 11.2%, the rate accepted by FERC in Docket No. ER07-XXX. It includes an additional 50 basis points for remaining a member of the SPP RTO.
- U Per Settlement, equity is limited to 52.5% of PSO's Capital Structure. If the percentage of equity exceeds the cap, the excess is included in long term debt in the cap structure. This value cannot change prior to 2/1/11. After this date it can only be changed via an approved 205 or 206 filing.

#### SOUTHWESTERN ELECTRIC POWER COMPANY

#### Letter

#### Notes

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

- b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting workpapers rather than using the allocations above.
- A The revenue credits shall include a) amounts received directly from the SPP for PTP transmission services, b) direct assignment charges for transmission facilities, the cost of which has been included in the TCOS, and c) amounts from customers taking service under grandfathered agreements, where the demand is not included in the rate divisor. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the TCOS are not included as revenue credits. Revenue from Transmission Customers whose coincident peak loads are included in the DIVISOR of the load-ratio share calculation are not included as revenue credits. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 1 are used to compute the revenue requirement for facilities and any upgrades.
- C This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet G shows the calculation of the trued-up revenue requirement for each project, based on an FCR rate caclulated from inputs on this TCOS. Line 15 shows the incremental ARR for projects receiving incentives as accepted by FERC. These individual additional revenue requirements are summed for the true-up year, and included here.
- D The gross plant, accumulated depreciation, and deferred tax balances included in rate base are reduced by the removal of balances related to Asset Retirement Obligations (AROs). This is to comply with the requirements of FERC Rulemaking RM02-7-000.
- E The total-company balances shown for Accounts 281, 282, 283, 190 only reflect ADIT that relates to utility operations. The balance of Account 255 is reduced by prior flow throughs and is completely excluded if the utility chose to utilize amortization of tax credits against FIT expense as discussed in Note N. An exception to this is pre-1971 ITC balances, which are required to be taken as an offset to rate base. Account 281 is not allocated. Transmission allocations are shown on Worksheet C.
- F Identified as being transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 68.
- H Consistent with Paragraph 657 of Order 2003-A, the amount on line is equal to the balance of IPP System Upgrade Credits owed to transmission customers that made contributions toward the construction of System upgrades, and includes accrued interest and unreturned balance of contributions. The annual interest expense is included on line 106.
- I Removes the expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- J Removes cost of transmission service provided by others to the extent such service is not incurred to provide the SPP service at issue.
- K General Plant and Administrative & General expenses may be functionalized based on allocators other then the W/S allocator. Full documentation must be provided.
- L Expense reported for these A&G accounts will be included in the cost of service only to the extent they are directly assignable to transmission service. Worksheet D allocates these expense items. Acct 928 Includes Regulatory Commission expenses itemized in FERC Form-1 at page 351, column H. FERC Assessment Fees and Annual Charges

shall not be allocated to transmission. Only safety-related and educational advertising costs in Account 930.1 are included in the TCOS. Account 930.2 includes the expenses incurred by the transmission function for Associated Business Development revenues given as a credit to the TCOS on Worksheet E.

Μ

This line complies with FERC requirement that Other Post Employment Benefits remain constant from an initial test year. Changes in this base amount can only occur via approval of a 205 filing.

Ν

Includes only FICA, unemployment, property and other assessments charged in the current year. Gross Receipts tax, Sales & Use taxes, and taxes related to income are excluded.

- P Effective January 1, 2007, Texas instituted a gross margin tax. This tax is calculated on the Texas allocated revenue of the Company, reduced by 30% to derive a "Gross Margin" for the Company. The tax rate of one percent is assessed on the resulting amount. The jurisdictional allocator is based on transmission demand allocators.
- Q Removes plant excluded from the OATT because it does not meet the SPP's definition of Transmission Facilities or is otherwise ineligible to be recovered under the OATT.
- R Removes transmission plant (e.g. step-up transformers) included in the development of OATT ancillary service rates and not already removed for reasons indicated in Note Q.
- S Includes functional wages & salaries incurred by parent company service corporation for support of the operating company.
- Long Term Debt cost rate = long-term interest (ln 125) / long term debt (ln 134). Preferred Stock cost rate = preferred dividends (ln 126) / preferred outstanding (ln 135).
   Common Stock cost rate (ROE) = 11.2%, the rate accepted by FERC in Docket No. ER07-XXX. It includes an additional 50 basis points for remaining a member of the SPP RTO.
- U Per Settlement, equity is limited to 52.5% of PSO's Capital Structure. If the percentage of equity exceeds the cap, the excess is included in long term debt in the cap structure. This value cannot change prior to 2/1/11. After this date it can only be changed via an approved 205 or 206 filing.

8	Average Balance for 2014 ((In 1 + In 7)/2)	61,922,005

### I. Calculate Return and Income Taxes with 0 basis point ROE increase for Projects Qualified

#### A. Determine 'R' with hypothetical 0 basis point increase in ROE for Identified Projects

ROE w/o incentives (Projected	ed TCOS, In 149)		11.20%	
Project ROE Incentive Adder	(Enter as whole nun	nber)	0	basis points
ROE with additional 0 basis p	oint incentive		11.20%	<==Incentive ROE Canno
Determine R (cost of long ter	rm debt, cost of pref	erred stock and percer	nt is from Projected TC	OS, Ins 147 through 149)
	<u>%</u>	Cost	Weighted cost	
Long Term Debt	49.75%	0.0557	0.0277	
Preferred Stock	0.00%	0.0000	0.0000	
Common Stock	50.25%	0.1120	<u>0.0563</u>	
		R =	0.0840	

#### B. Determine Return using 'R' with hypothetical 0 basis point ROE increase for Identified Projects.

Rate Base (Projected TCOS, In 75)	650,570,577
R (from A. above)	0.0840
Return (Rate Base x R)	54,637,501

C. Determine Income Taxes using Return with hypothetical 0 basis point ROE increase for Identified Projects.

Return (from B. above)	54,637,501
Tax Rate (Projected TCOS, In 109)	38.09%
EIT=(T/(1-T)) * (1-(WCLTD/WACC)) =	41.23%
Income Tax Calculation (Return x EIT)	22,524,335
ITC Adjustment (Projected TCOS, In 116)	(379,265)
Income Taxes	22,145,071

### II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 0 basis point ROE increase.

#### A. Determine Net Revenue Requirement less return and Income Taxes.

Net Revenue Requirement (Projected TCOS, In 123)	143,051,810
Return (Projected TCOS, In 118)	54,637,501
Income Taxes (Projected TCOS, In 117)	22,145,071
Gross Margin Taxes (Projected TCOS, In 122)	403,860
Net Revenue Requirement, Less Return and Taxes	65,865,378

#### B. Determine Net Revenue Requirement with hypothetical 0 basis point increase in ROE.

Net Revenue Requirement, Less Return and Taxes	65,865,378
Return (from I.B. above)	54,637,501
Income Taxes (from I.C. above)	22,145,071
Net Revenue Requirement, with 0 Basis Point ROE increase	142,647,950
Gross Margin Tax with 0 Basis Point ROE Increase (II C. below)	403,860
Revenue Requirement w/ Gross Margin Taxes	143,051,810
Less: Depreciation (Projected TCOS, In 95)	27,464,865
Net Rev. Req, w/0 Basis Point ROE increase, less Depreciation	115,586,945

#### C. Determine Gross Margin Tax with hypothetical 0 basis point increase in ROE. Net Revenue Requirement before Gross Margin Taxes, with 0 142,647,950

Net revenue requirement before cross margin raxes, with o	1+2,0+1,000
Basis Point ROE increase (II B. above)	
Apportionment Factor to Texas (Worksheet K, In 12)	40.33%
Apportioned Texas Revenues	57,530,294
Taxable Percentage of Revenue (70%)	70%
Taxable, Apportioned Margin	40,271,206
Texas Gross Margin Tax Rate	1%
Texas Gross Margin Tax Expense	402,712
Gross-up Required for Gross Margin Tax Expense	1,148
Total Additional Gross Margin Tax Revenue Requirement	403,860

#### D. Determine FCR with hypothetical 0 basis point ROE increase.

III.

Net Transmission Plant (Projected TCOS, Ins 46, 47, 48, 49, 51)	877,621,345
Net Revenue Requirement, with 0 Basis Point ROE increase	142,647,950
FCR with 0 Basis Point increase in ROE	16.25%
Net Rev. Req, w / 0 Basis Point ROE increase, less Dep.	115,586,945
FCR with 0 Basis Point ROE increase, less Depreciation	13.17%
FCR less Depreciation (Projected TCOS, In 12)	<u>13.17%</u>
	0.00%
Incremental FCR with 0 Basis Point ROE increase, less Depreciation	
Calculation of Composite Depreciation Rate	
Transmission Plant @ Beginning of Period (P.206, In 58)	1,164,661,669 <==From Input on Worksheet B
Transmission Plant @ End of Pariad (P 207 In 50)	1 200 ZZZ CE1 . From Innut on Workshoot D

Transmission Plant @ End of Period (P.207, In 58)	1,300,777,651 <==From Input on Wor
	2,465,439,320
Transmission Plant Average Balance for 2014	1,232,719,660
Annual Depreciation Expense (Historic TCOS, In 246)	29,100,387
Composite Depreciation Rate	2.36%
Depreciable Life for Composite Depreciation Rate	42.36
Round to nearest whole year	42

AEP West SPP Member Companies 2015 Cost of Service Formula Rate Projected on 2014 FF1 Balances Worksheet G - Calculation of TRUED-UP Annual Revenue Requirement for BPU and Special-billed Projects Based on a Carrying Charge Derived from Trued-Up 2014 Data SOUTHWESTERN ELECTRIC POWER COMPANY

#### Calculate Return and Income Taxes with 0 basis point ROE increase for Projects Qualified for I.

### A. Determine 'R' with hypothetical 0 basis point increase in ROE for Identified Projects

ROE w/o incentives (True-	Up TCOS, In 136)	)	11.20%	
Project ROE Incentive Adde	er (Enter as whole	number)	0	basis points
ROE with additional 0 basis	point incentive		11.20%	<==Incentive ROE Canno
Determine R (cost of long t	term debt, cost of p	preferred stock and per	rcent is from True-Up T	COS, Ins 134 through 136)
	<u>%</u>	<u>Cost</u>	Weighted cost	
Long Term Debt	49.37%	0.0564	0.0278	
Preferred Stock	0.00%	0.0000	0.0000	
Common Stock	50.63%	0.1120	<u>0.0567</u>	
		R =	0.0845	

### B. Determine Return using 'R' with hypothetical 0 basis point ROE increase for Identified Projects.

Rate Base (True-Up TCOS, In 63)	565,136,314
R (from A. above)	0.0845
Return (Rate Base x R)	47,769,544

### C. Determine Income Taxes using Return with hypothetical 0 basis point ROE increase for Identified Projects.

Return (from B. above)	47,769,544
Tax Rate (True-Up TCOS, In 96)	38.09%
EIT=(T/(1-T)) * (1-(WCLTD/WACC)) =	41.27%
Income Tax Calculation (Return x EIT)	19,715,897
ITC Adjustment (True-Up TCOS, In 103)	(361,344)
Income Taxes	19,354,554

### II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 0 basis point ROE increase.

#### A. Determine Net Revenue Requirement less return and Income Taxes.

Net Revenue Requirement (True-Up TCOS, In 110) Return (True-Up TCOS, In 105)	132,129,965 47,769,544
Income Taxes (True-Up TCOS, In 104)	19,354,554
Gross Margin Taxes (True-Up TCOS, In 109)	373,026
Net Revenue Requirement, Less Return and Taxes	64,632,841

### B. Determine Net Revenue Requirement with hypothetical 0 basis point increase in ROE.

Net Revenue Requirement, Less Return and Taxes	64,632,841
Return (from I.B. above)	47,769,544
Income Taxes (from I.C. above)	19,354,554
Net Revenue Requirement, with 0 Basis Point ROE increase	131,756,938
Gross Margin Tax with Basis Point ROE Increase (II C. below)	373,026
Revenue Requirement w/ Gross Margin Taxes	132,129,965
Less: Depreciation (True-Up TCOS, In 83)	27,369,147
Net Rev. Req, w/0 Basis Point ROE increase, less Depreciation	104,760,818

#### C. Determine Gross Margin Tax with hypothetical 0.112 basis point increase in ROE. Net Revenue Requirement before Gross Margin Taxes, with 0 131,756,938

Basis Point ROE increase (II B. above)	
Apportionment Factor to Texas (Worksheet K, In 12)	40.33%
Apportioned Texas Revenues	53,137,921
Taxable Percentage of Revenue (70%)	70%
Taxable, Apportioned Margin	37,196,544
Texas Gross Margin Tax Rate	1%
Texas Gross Margin Tax Expense	371,965
Gross-up Required for Gross Margin Tax Expense	1,061
Total Additional Gross Margin Tax Revenue Requirement	373,026

#### D. Determine FCR with hypothetical 0 basis point ROE increase.

Net Transmission Plant (True-Up TCOS, In 39) Net Revenue Requirement, with 0 Basis Point ROE increase	770,733,898
FCR with 0 Basis Point increase in ROE	17.14%
Net Rev. Req, w / 0 Basis Point ROE increase, less Dep.	104,760,818
FCR with 0 Basis Point ROE increase, less Depreciation	13.59%
FCR less Depreciation (True-Up TCOS, In 12)	<u>13.59%</u>
Incremental FCR with 0 Basis Point ROE increase, less Depreciation	0.00%

### **III.** Calculation of Composite Depreciation Rate

	1 300 777 651	
Transmission Plant @ End of Period (P.207, In 58)	1,000,777,001	<==From Input on Workshe
	2,465,439,320	-
Transmission Plant Average Balance for 2014	1,232,719,660	
Annual Depreciation Expense (True-Up TCOS, In 83)	29,100,387	
Composite Depreciation Rate	2.36%	
Depreciable Life for Composite Depreciation Rate	42.36	
Round to nearest whole year	42	

not Exceed 12.45%

		Rev R	Require	W Ir	ncentives	Incentiv	ve Amounts
TRUE-UP YEAR	2014						
∑ Prior Year F	Projected (WS-F)	\$	44,179,672	\$	44,179,672	\$	
∑ Prior Year	True-Up (WS-G)	\$	44,105,038	\$	44,105,038	\$	
True-up A	djustment For 2014	<u> </u>	(74,635)		(74,635)		

Note: Review formulas in summary to ensure the proper year's revenue requirement is being accumulated for each project from the tables below.

## AEP - SPP Formula Rate SWEPCO TCOS - WS H Page: 63 of 69

### AEP West SPP Member Companies Cost of Service Formula Rate Using 2014 FF1 Balances Worksheet H - Revenue Credits for Historic Period SOUTHWESTERN ELECTRIC POWER COMPANY

## **Revenue Credits for**

		Total Company	Non- Transmission	Transmission
I.	Account 450, Forfeited Discounts	4,939,147	4,939,147	
II.	Account 451, Miscellaneous Service Revenues	2,681,834	2,681,834	
III.	Account 454, Rent from Electric Property			
	1 Account 4540001 - Rent from Elect Property-Aff	1,782,477	1,782,477	
	2 Account 4540002 - Rent from Elect Property - Non-Aff	3,205,744	3,162,835	42,909
	3 Account 4540005 - Rent from Elect Property - Pole Attach	47,873	47,873	
	4 Account 4540004 - Rent from Elect Property - ABD - Non-Aff	4,209,431	4,209,431	
	5 Total Rents from Electirc Property	9,245,526		42,909

(Revenue related to transmission facilities for pole attachments, rentals, etc. Provide data sources and explanations in Section VIII, Notes below)

IV. Account 4560015, Revenues from Associated Business Development 1 Account 4560015, Revenues from Associated Business Development 832,302	52,141
	- /
V. Total Other Operating Revenues To Reduce Revenue Requirement	95,050
VI. Account 456.1, Revenues from Transmission of Electricity of Others	65,714,089
(Provide data sources and any detailed explanations necessary in Section VIII Notes below) Less:	
1 Transmission Direct Assignment Revenue (if costs not in the ARR)	
2 Sponsored Upgrade Revenue	
3 Credits against Transmission Service Revenue related to Generation Interconnections	1,197,683
4 Revenue for GFA's (Relative to SPP OATT) Associated with Load Included in the Divisor	
5 Network Service Revenue (SPP Schedule 9) Associated with Load included in the Divisor	34,005,635
6 Revenue Associated with Transmission Plant Excluded From SPP Tariff	
7 Distribution and Other Non-Transmission Revenue	525,492
8 Revenue from SPP Ancillary Services Provided	2,107,287
9 Base Plan Revenue (from SPP)	20,183,649
10 Flow Through of ERCOT Ancillary Charges	
11 Other	
Net Transmission Credits	\$7,694,343
VII. Total Worksheet A Revenue Credits	\$7,789,393
VIII. Data Sources:	

Data for this worksheet came from the FERC Form 1 and the Company's General Ledger.

#### AEP West SPP Member Companies Cost of Service Formula Rate Using 2014 FF1 Balances Worksheet I - Supporting Transmission Expense Adjustments SOUTHWESTERN ELECTRIC POWER COMPANY

1	Other Expenses		
2	Direct Assignment Charge		\$0
3	Sponsored Upgrades Charge		\$0
4	Firm and Non-Firm Point-To-Point Charges		\$0
5	Base Plan Charges		\$0
6	Schedule 9 Charges		\$0
7	SPP Schedule 12 - FERC Assessment		\$0
8	SPP Schedule 1-A		\$0
9	SPP Annual Assessment		\$0
10	Ancillary Services Expenses		\$0
11	Other		\$0
12	Other		\$0
13	Other		\$0
14	Total	( sum of lines 2 through 13 )	\$0

Adjustment to charges that are booked to transmission accounts that are the responsibility of the TO's LSE.

NOTE: Exclusion of Accounts 561 and 565 from O&M Expense in the TCOS templates eliminates the need to use this worksheet.
