acpribisko@aep.com

This presentation contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. Although AEP and each of its Registrant Subsidiaries believe that their expectations are based on reasonable assumptions, any such statements may be influenced by factors that could cause actual outcomes and results to be materially different from those projected. Among the factors that could cause actual results to differ materially from those in the forward-looking statements are: changes in economic conditions, electric market demand and demographic patterns in AEP service territories, the impact of pandemics and any associated disruption of AEP’s business operations due to impacts on economic or market conditions, costs of compliance with potential government regulations, electricity usage, supply chain issues, customers, service providers, vendors and suppliers, the economic impact of increased global trade tensions including the conflict between Russia and Ukraine, and the adoption or expansion of economic sanctions or trade restrictions, inflationary or deflationary interest rate trends, volatility and disruptions in the financial markets precipitated by any cause including failure to make progress on federal budget or debt ceiling matters or instability in the banking industry, particularly developments affecting the availability or cost of capital to finance new capital projects and refinance existing debt, the availability and cost of funds to finance working capital and capital needs, particularly (i) if expected sources of capital, such as proceeds from the sale of assets, subsidiaries or tax credits, do not materialize, and (ii) during periods when the time lag between incurring costs and recovery is long and the costs are material, decreased demand for electricity, weather conditions, including storms and drought conditions, and the ability to recover significant storm restoration costs, the cost of fuel and its transportation, the creditworthiness and performance of fuel suppliers and transporters and the cost of storing and disposing of used fuel, including coal ash and spent nuclear fuel, the availability of fuel and necessary generation capacity and performance of generation plants, the ability to recover fuel and other energy costs through regulated or competitive electric rates, the ability to transition from fossil generation and the ability to build or acquire renewable generation, transmission lines and facilities (including the ability to obtain any necessary regulatory approvals and permits) when needed at acceptable prices and terms, including favorable tax treatment, meet cost caps imposed by regulators and other operational commitments to regulatory commissions and customers for renewable generation projects, and to recover all related costs, new legislation, litigation or government regulation, including changes to tax laws and regulations, oversight of nuclear generation, energy commodity trading and new or heightened requirements for reduced emissions of sulfur, nitrogen, mercury, carbon, soot or particulate matter and other substances that could impact the continued operation, cost recovery and/or profitability of generation plants and related assets, the impact of federal tax legislation on results of operations, financial condition, cash flows or credit ratings, the risks before, during and after generation of electricity associated with the fuels used or the byproducts and wastes of such fuels, including coal ash and spent nuclear fuel, timing and resolution of pending and future rate cases, negotiations and other regulatory decisions, including rate or other recovery of new investments in generation, distribution and transmission service and environmental compliance, resolution of litigation, the ability to constrain operation and maintenance costs, prices and demand for power generated and sold at wholesale, changes in technology, particularly with respect to energy storage and new, developing, alternative or distributed sources of generation, the ability to recover through rates any remaining unrecovered investment in generation units that may be retired before the end of their previously projected useful lives, volatility and changes in markets for coal and other energy-related commodities, particularly changes in the price of natural gas, the impact of changing expectations and demands of customers, regulators, investors and stakeholders, including heightened emphasis on environmental, social and governance concerns, changes in utility regulation and the allocation of costs within regional transmission organizations, including ERCOT, PJM and SPP, changes in the creditworthiness of the counterparties with contractual arrangements, including participants in the energy trading market, actions of rating agencies, including changes in the ratings of debt, the impact of volatility in the capital markets on the value of the investments held by the pension, other postretirement benefit plans, captive insurance entity and nuclear decommissioning trust and the impact of such volatility on future funding requirements, accounting standards periodically issued by accounting standard-setting bodies, and other risks and unforeseen events, including wars and military conflicts, the effects of terrorism (including increased security costs), embargoes, naturally occurring and human-caused fires, cyber security threats and other catastrophic events, the ability to attract and retain requisite work force and key personnel.

AEP Is Powering the Future

One of the Largest Utilities in the U.S. by Rate Base and Market Cap

Delivering Consistent, Strong Performance

- Stable, resilient business allows us to keep customer rates affordable
- Commitment to 6%-7% annual operating earnings growth; dividend growth is in line with earnings
- 9%-10% consistent total shareholder return
- Strong balance sheet with a targeted FFO/Debt of 14%-15%
- 2023 operating earnings guidance range of \$5.19-\$5.39

Operating Attractive Transmission and Distribution Assets

- Largest transmission provider in the U.S.
- One of the largest distribution providers in the U.S.
- Bolstered by organic growth with diversity in geographic footprint and customer base
- Capital forecast of \$40B includes \$15B of transmission investment and \$11B of distribution investment

Leading the Clean Energy Transition

- Proven track record of investing in sustainability and reducing fleet emissions
- Plans to add 17 GW of new resource opportunities between 2023 and 2032
- Goal of net zero by 2045
- Capital forecast includes \$9B of regulated renewable investment

Actively Managing the Business and Portfolio

- Immediate-term focus on de-risking and simplifying business
- Thoughtful and proactive portfolio management and investment to support strategy
- Strong employee base led by experienced leaders with a shared passion for the AEP mission

Proven Track Record of EPS Performance

Over a decade of meeting or exceeding original EPS guidance

¹ 2023 operating EPS guidance is \$5.19-\$5.39.

 Actual Result

Actual operating EPS in comparison to original EPS guidance range

Strong Dividend Growth

Targeted payout ratio 60-70% of operating earnings

Over 112 years of consecutive quarterly dividends

Targeted dividend growth in line with earnings

¹ Targeted dividend growth is in-line with 6%-7% annual operating earnings growth, subject to approval by Board of Directors.

EPS Growth + Dividend Yield = 9% to 10% Annual Return Opportunity

Stakeholder Commitments

**6%-7% Annual
Operating Earnings
Growth**

**ESG Goal of Net
Zero by 2045**

**Dividend Growth In-line with
Earnings Growth and Targeted
Payout Ratio of 60%-70%**

**Customer Care: Commitment to
Identification and Realization of
Efficiencies to Keep Customer Rates
Affordable**

**Strong Balance Sheet
with a Target FFO/Debt
of 14%-15%**

**Active Management of the AEP
Portfolio with the Primary Objective
to De-risk and Simplify Our
Business**

Positioning for the Future

2023-2027 Capital Forecast

Shift to Wires and Renewables

2023-2027 Cash Flows and Financial Metrics

Rate Base Growth

Efficient Cost Recovery Mechanisms

2023-2027 Capital Forecast of \$40B

The ability to quickly redeploy transmission and distribution investment ensures we maintain capital spend while mitigating customer bill impact

On a system average, we expect rates to go up approximately 4% annually over the forecasted period

Capital forecast emphasizes investment in wires and renewables

¹ With the 2023 Kentucky operations sale termination, Kentucky related capital will be absorbed within the current capital plan while maintaining the existing functional split.

99%
of capital allocated to regulated businesses

\$26B 65%
allocated to wires

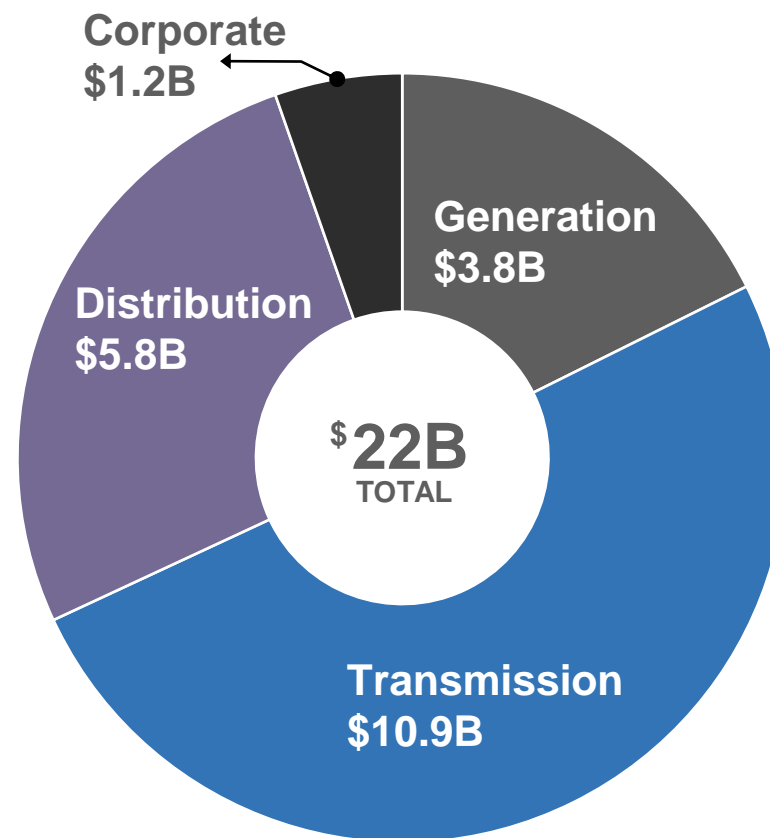

\$9B 22%
allocated to regulated renewables

7.5%
resulting rate base CAGR

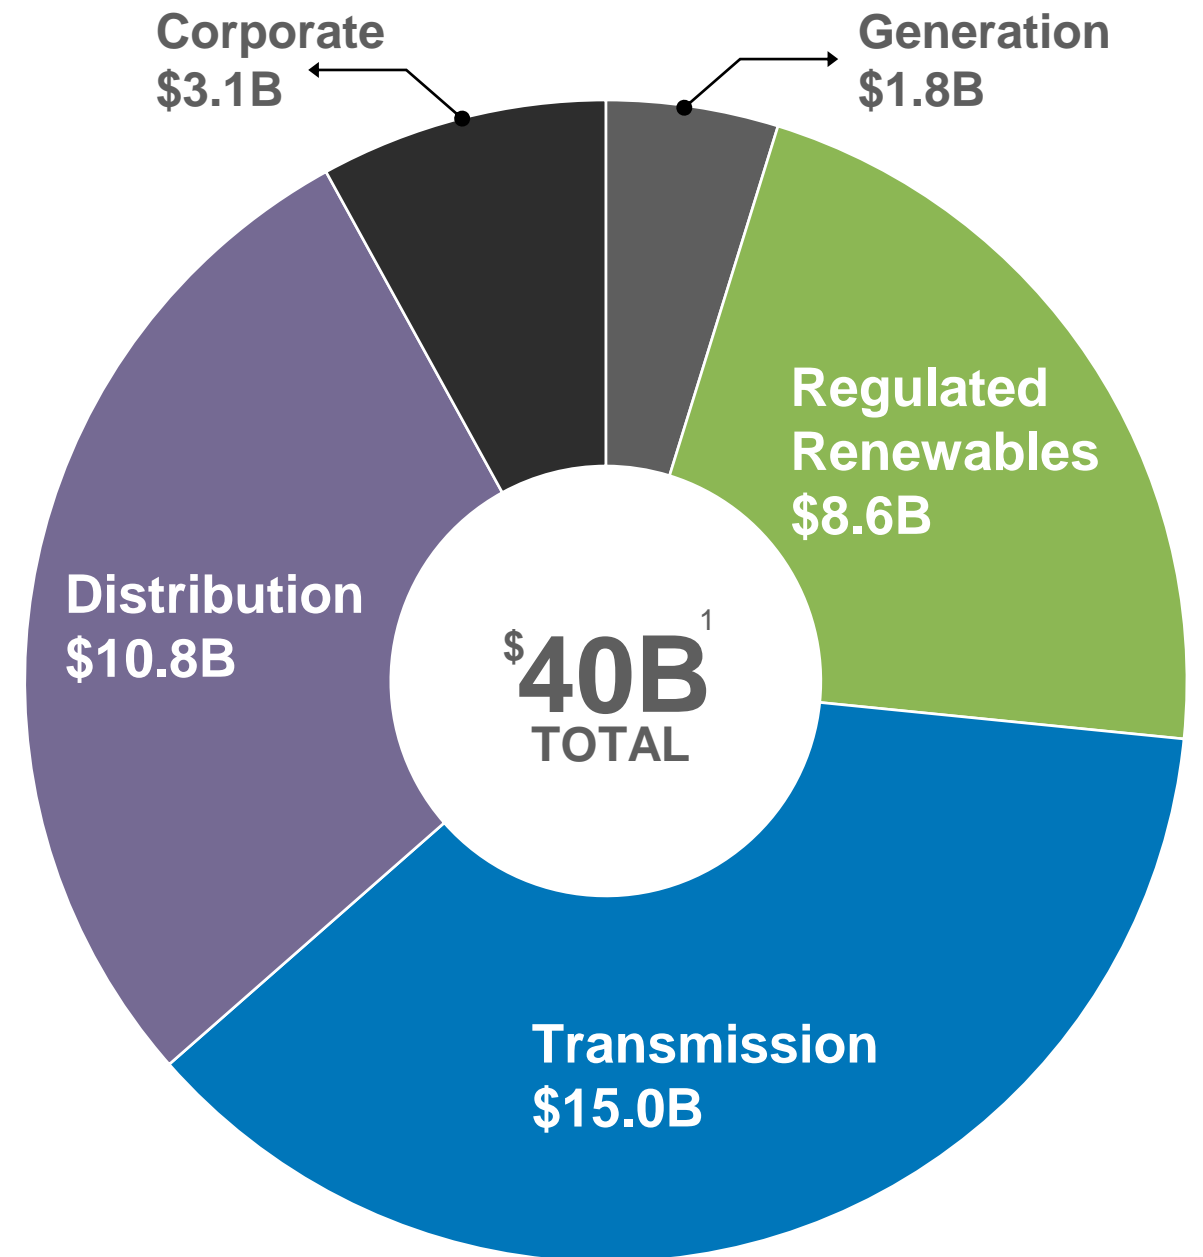

Shift to Wires and Renewables

~90% of future investment
is in wires and renewable
generation

**2013-2017
Regulated Capital**

**2023-2027 Regulated
Capital Forecast**

¹ With the 2023 Kentucky operations sale termination, Kentucky related capital will be absorbed within the current capital plan while maintaining the existing functional split.

2023-2027 Cash Flows and Financial Metrics

Cash proceeds related to the sale of unregulated contracted renewable assets are included in 2023; proceeds from other future assets sales are not included

\$ in millions	2023E	2024E	2025E	2026E	2027E

Other Asset Sales and Strategic Review Announcements

Sell New Mexico Renewable Development (NMRD), a joint venture solar portfolio

- A 50/50 joint venture partnership with PNM Resources consisting of 8 operating projects of 135 MW, 1 project under construction of 50 MW, 6 development projects of 440 MW, all located in New Mexico
- Book value of AEP's investment as of 3/31/2023 was \$102M
- Assets contribute \$0.01 EPS in 2023 operating earnings guidance
- Advisor hired; sale announcement early in Q4 2023 with transaction close by the end of 2023

Sell Retail and Distributed Resources businesses (not including NMRD)

- Book value of AEP's investment as of 3/31/2023: \$200M Retail and \$350M Distributed Resources
- Assets EPS contributions in 2023 operating guidance: \$0.04 Retail and \$0.02 Distributed Resources
- Advisor hired; sale launch in Summer 2023 with transaction close in the first half of 2024

Strategic review of certain non-core transmission joint venture businesses

- Businesses under strategic review include Prairie Wind Transmission, Pioneer Transmission and Transource Energy
- Portfolio includes approximately 370 pole line miles, 4 substations and projects under development in PJM and SPP
- As of 3/31/2023, AEP's portion of PP&E was \$551M and rate base was \$456M
- Assets contribute \$0.05 EPS in 2023 operating earnings guidance
- Complete strategic review by end of 2023

De-risk and simplify the business profile through active management

Transmission Joint Venture Businesses

In 2023 operating earnings guidance, Prairie Wind, Pioneer and Transource Energy transmission joint ventures contribute \$0.05 EPS; as of 3/31/2023, AEP's portion of PP&E was \$551M and rate base was \$456M

¹ The Independence Energy Connection transmission project was approved by the Maryland commission and rejected by the Pennsylvania commission; federal litigation is currently pending. The project received the abandonment incentive from FERC.

Proven Track Record of Reducing Fleet Emissions

Coal Fleet Transition

Transforming Our Generation Fleet

Committed to Being a Top ESG Employer

Commitment to ESG

ENVIRONMENTAL

- Accelerated CO₂ emission goals: 80% reduction by 2030 off a new 2005 baseline and accelerated net-zero goal by 2045
- 47% reduction in coal capacity as a percent of total capacity by 2032
- 2022 coal capacity = 12.2% of rate base; 2022 coal revenue = 10.5% of total revenue
- Clean energy transition tied to long-term incentive compensation

SOCIAL

- Promote diversity, equity and inclusion
- Service territory economic and business development
- Just Transition strategy
- Environmental and Social Justice Policy
- AEP Foundation Launched Delivering on the Dream: Social and Racial Justice grant program in 2021
- Zero Harm Safety Culture
- Human Rights Policy

GOVERNANCE

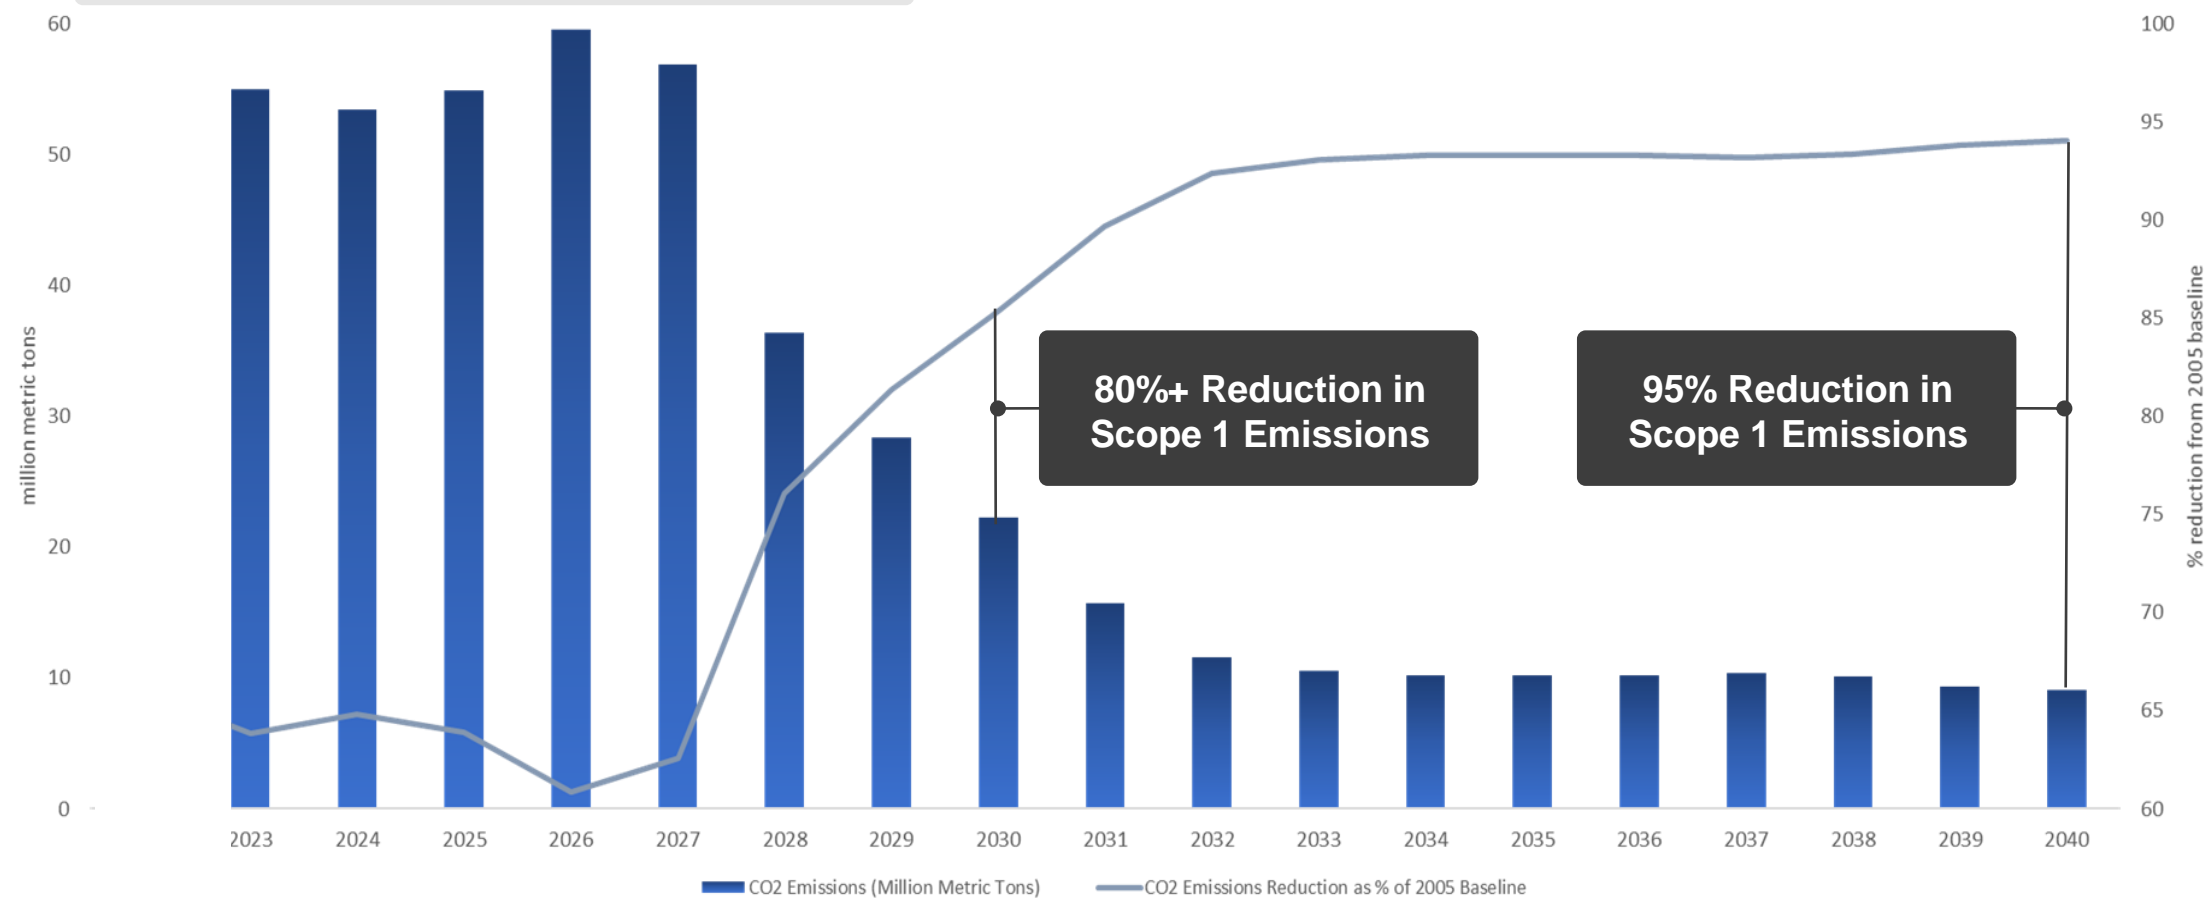

- 13 Board of Directors, 11 independent directors
- 62% Board diversity
- Average Board tenure of 6.5 years
- Annual shareholder engagement on strategy and ESG matters with lead independent director participation
- Environmental reports provided at every Board meeting

Proven Track Record of Reducing Fleet Emissions

Forecasted CO₂ Emissions (Scope 1)

Projections based upon filed Integrated Resource Plans current as of 12/31/2022 for regulated companies and also assumes an extension of the Cook nuclear power plant through the forecast period. Ability to meet the transition timeline is dependent upon market availability of resources, regulatory approvals, transmission system availability, etc.

66%

Reduction in CO₂ emissions from 152M metric tons in 2005 to 51M metric tons in 2022

98%

Reduction in SO₂ emissions between 1990-2022

95%

Reduction in NO_x emissions between 1990-2022

98%

Reduction in mercury air emissions from 2001-2022

Continuing to Advance Our Coal Fleet Transition

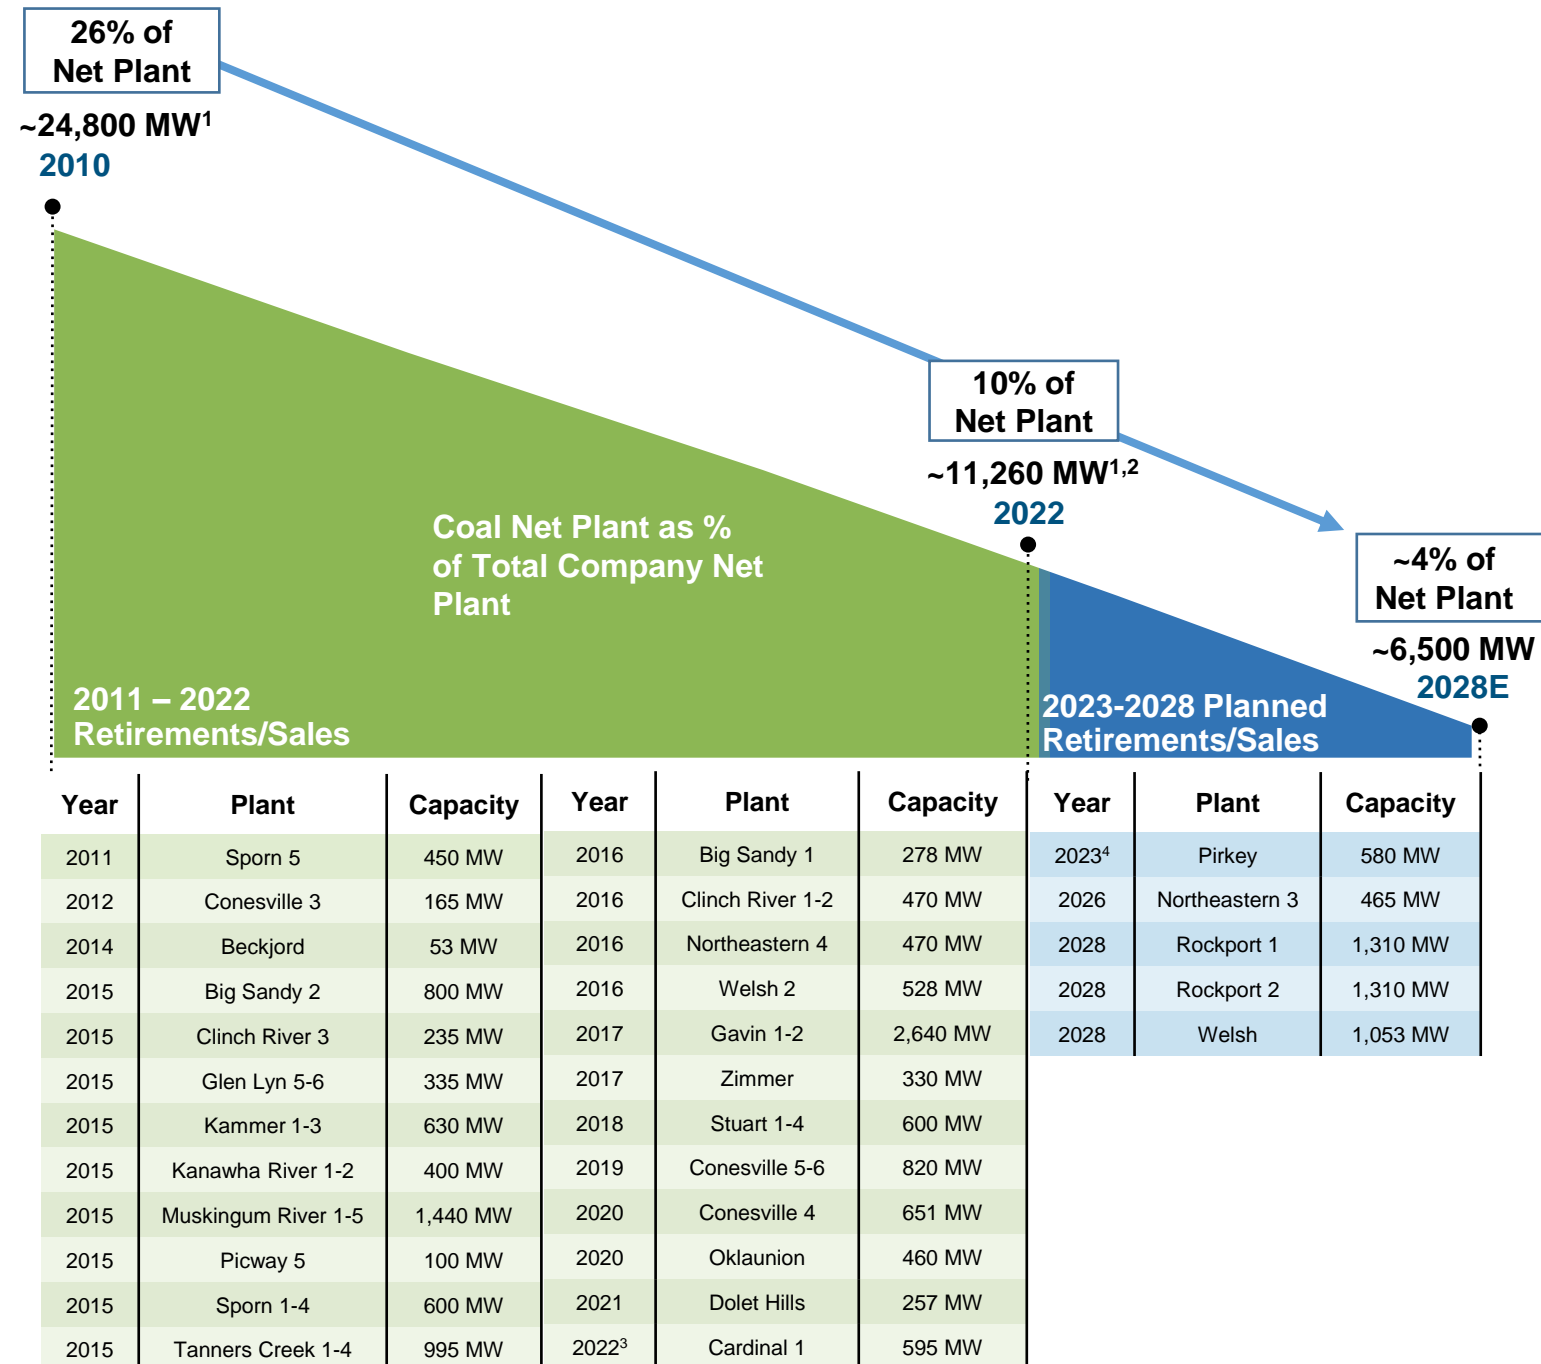

Coal-fired generation retirements pave the way for ~17 GW of new generation opportunities over the next ten years

¹ Total includes owned coal units and Rockport 2; excludes AEP's investment in OVEC.

² Includes 2012 Turk Plant addition.

³ In April 2022, AEP executed simultaneous agreements with Buckeye Power to sell Cardinal 1 and purchase 100% of the output through 2028 via a PPA. The sale was completed in August 2022.

⁴ In March 2023, AEP retired SWEPCO's 580 MW Pirkey coal plant.

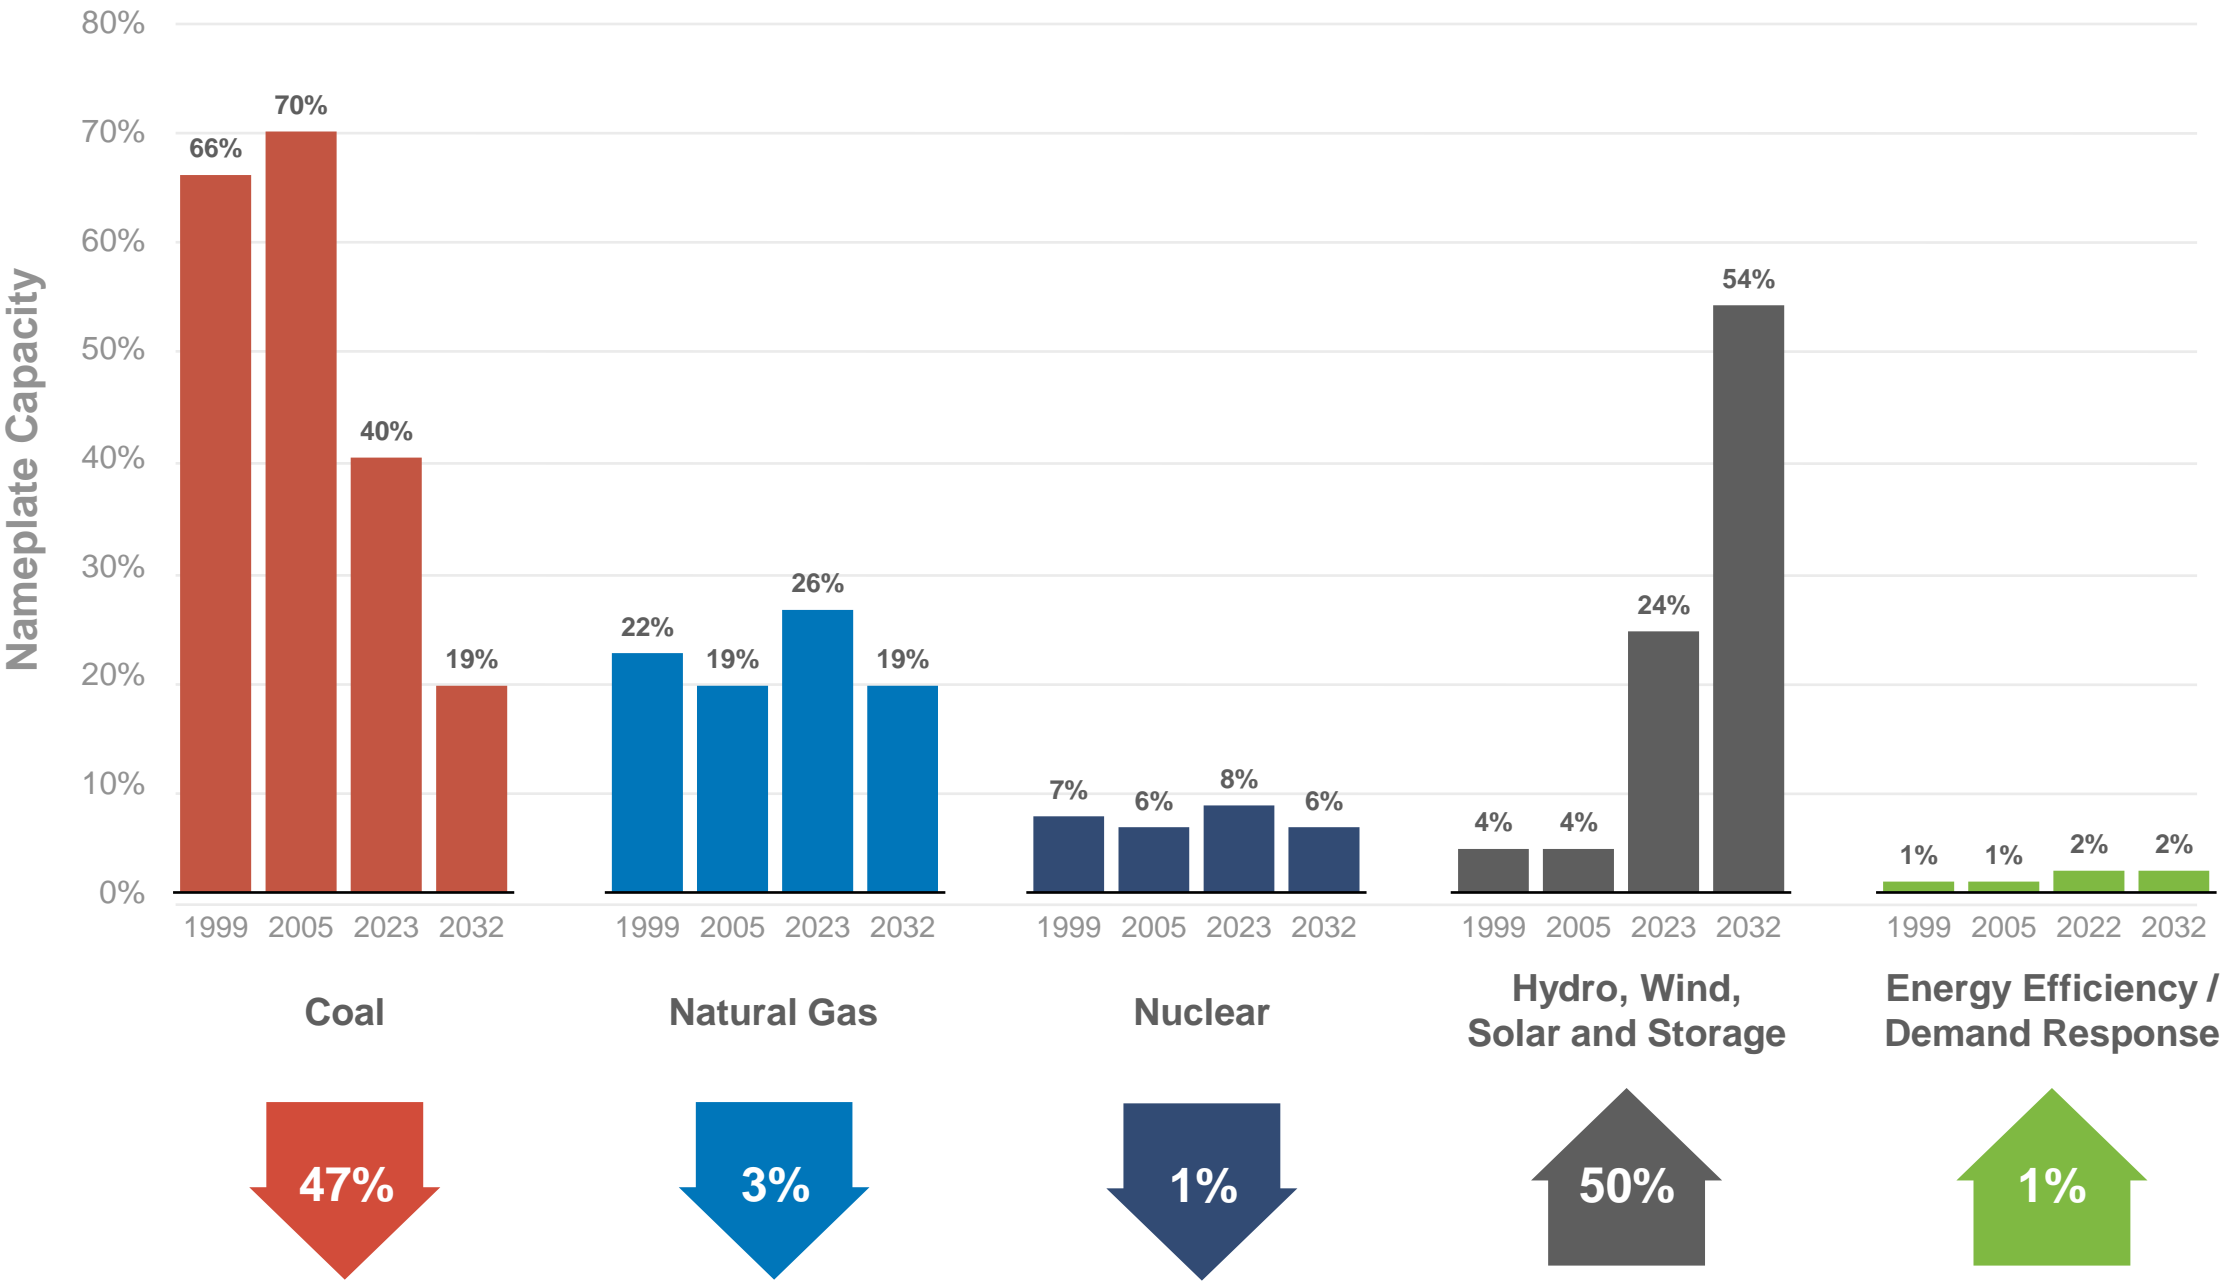

Transforming Our Generation Fleet

Capacity includes both owned and PPA generation. Energy Efficiency / Demand Response represents avoided capacity rather than physical assets.

2023 data as of 3/31/2023.

2032 coal capacity includes WV's Amos, Mountaineer and Mitchell plants as well as SWEPCO's Turk and Flint Creek plants.

2032 Hydro, Wind, Solar and Storage capacity includes pending sales of unregulated contracted renewable assets and the distributed resources. Excluding capacity from both businesses would not materially change the 2032 projected capacity mix.

Committed to Being a Top ESG Employer

Linking Investments to Outcomes: Regulated Capital Investment Strategy

KEY INVESTMENT STRATEGIES

- **Transform our electric generation fleet** to drive down costs to customers and achieve our climate goals
- **Develop a modern and secure electric transmission grid** to bolster system reliability, enhance market efficiency and integrate new generation resources
- **Modernize the electric distribution system** to enhance reliability, accommodate changing resources, loads, advanced technologies and increase customer satisfaction
- Work with regulators, policymakers, and key stakeholders to **ensure a durable and sustainable transition to a clean energy economy** by balancing decarbonization goals and timelines with system reliability, resiliency, security and affordability

Our flexible and robust capital plan is designed to meet our customer needs and provide the ability to strategically shift capital to deliver on our 6-7% EPS growth commitment

Stable and Efficient Transmission Investment Recovery

Transmission Cost Recovery in AEP States

- Full tracker or rider recovery
- Partial tracker or rider recovery

ROE	9.85% Base ¹ + 0.50% RTO adder	10.0% Base + 0.50% RTO adder	9.4%
Forward Looking Rates	Yes	Yes	Capital updates allowed 2x per year (not forward looking)
Equity Layer	Capped at 55%	No Cap	Capped at 42.5%
Rate Approval Date	May 2019	June 2019	April 2020

¹ AEP Ohio Transmission, represents base ROE only.

² Table data for ERCOT reflects AEP Texas subsidiary; AEP's ETT joint venture in ERCOT has 9.6% ROE, 40% equity layer with rate approved in January 2021.

~95% of transmission capital investment is recovered through state tracker/rider mechanisms

TRANSMISSION

DISTRIBUTION

REGULATED NEW GENERATION

AEP Transmission Holdco Legal Entity Structure

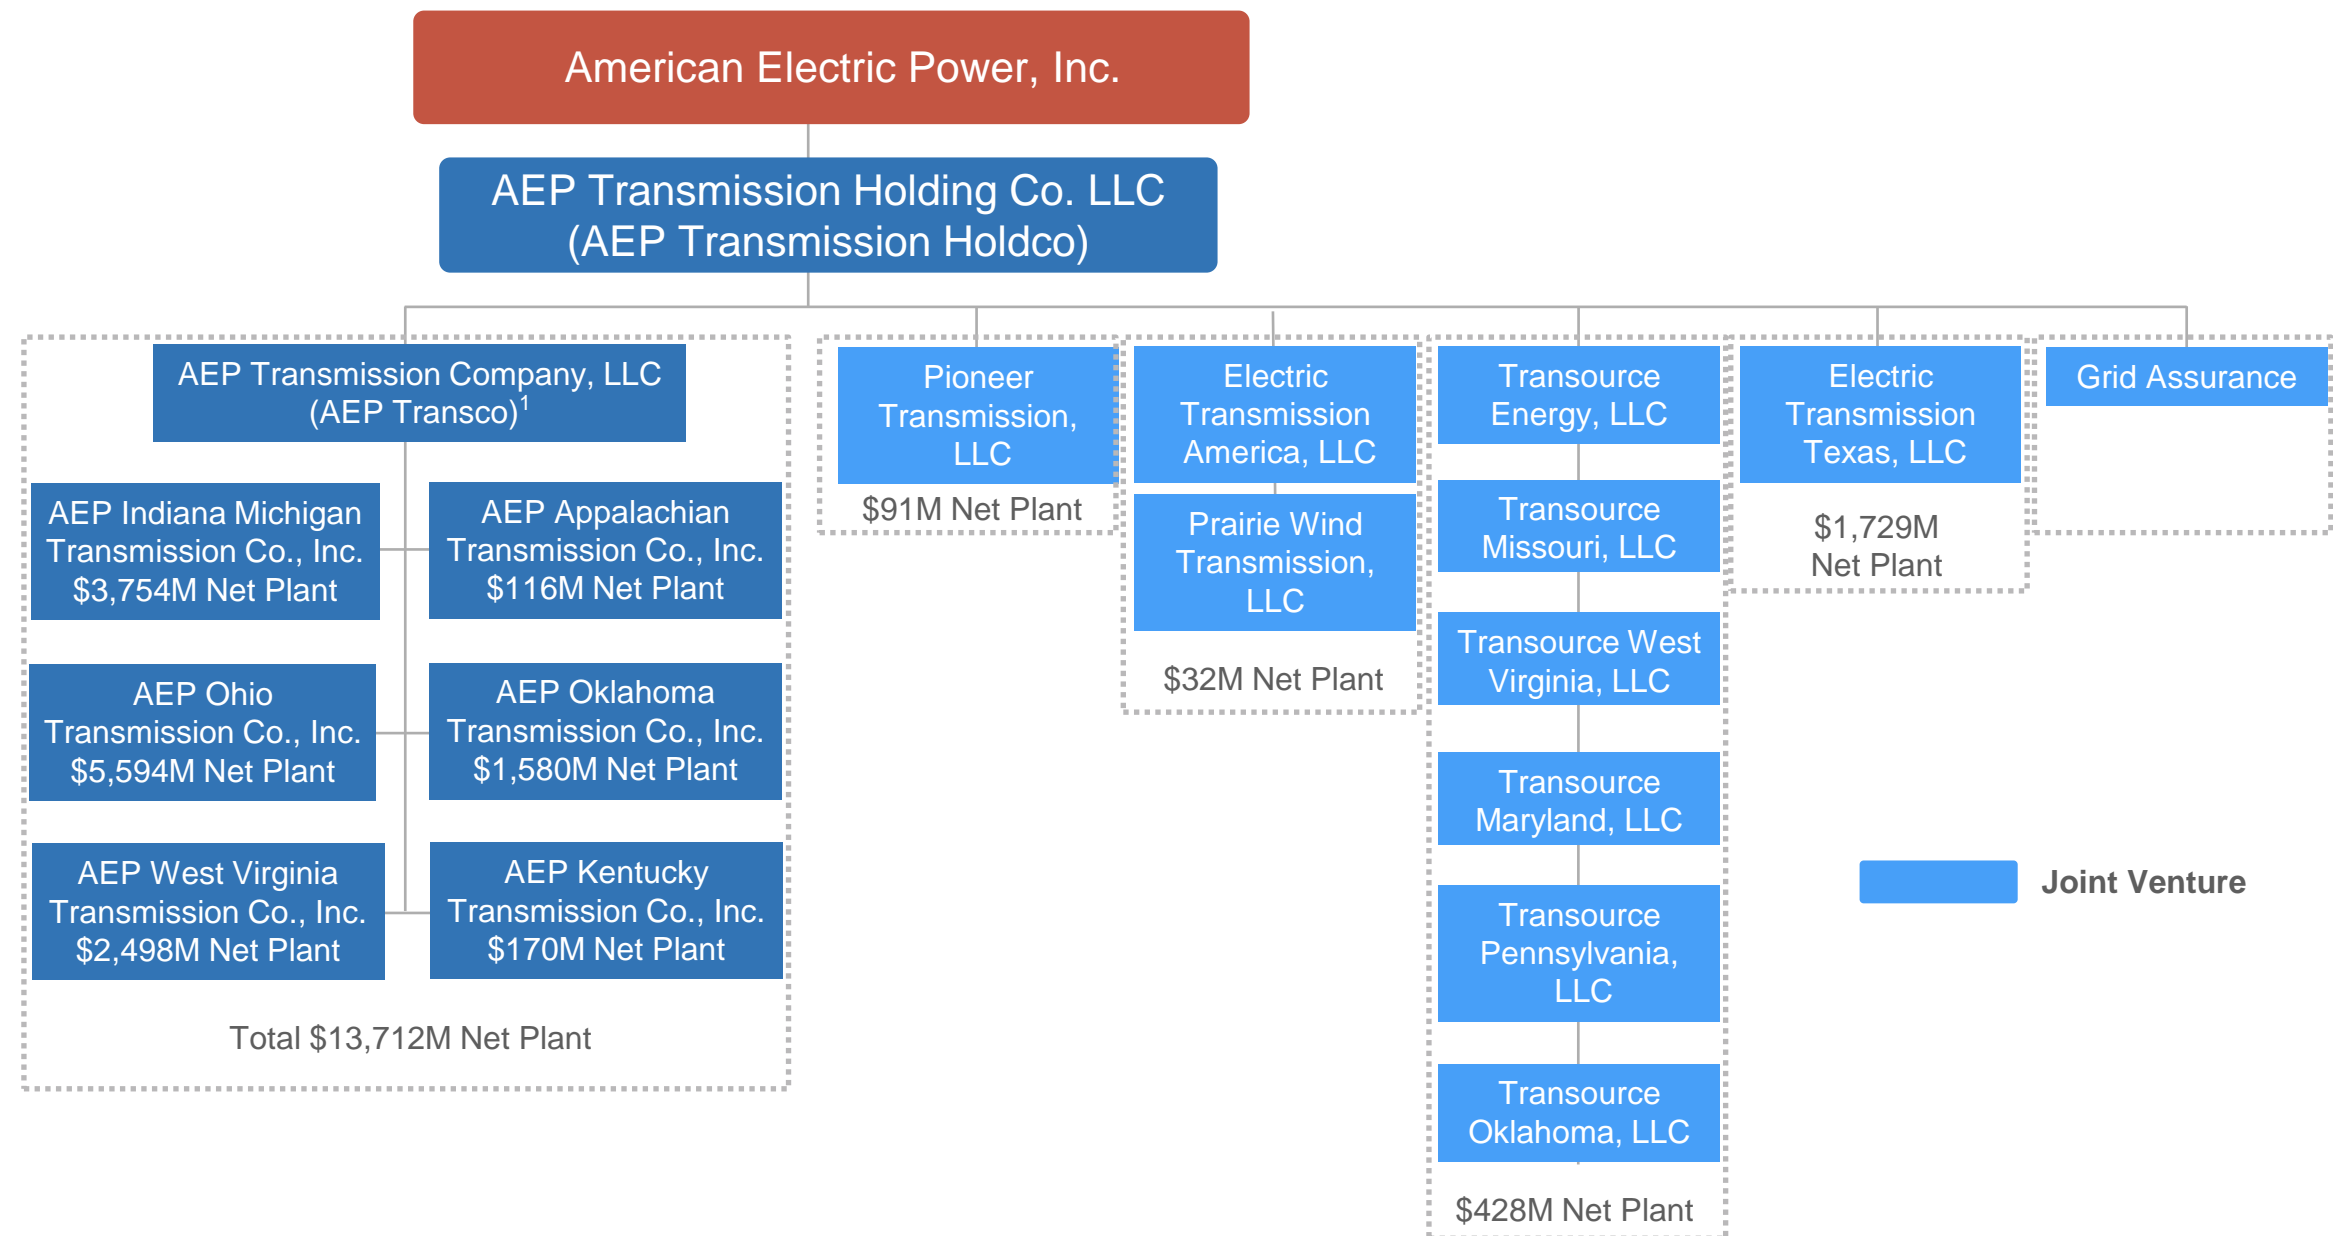

AEP Transmission Company, LLC (AEP Transco) is wholly-owned by AEP Transmission Holding Company, LLC (AEP Transmission Holdco)

AEP Transmission Holdco is a wholly-owned subsidiary of American Electric Power Company, Inc. (AEP), one of the largest utility holding companies in the U.S.

Joint Venture net plant balances reflect AEP's portion.

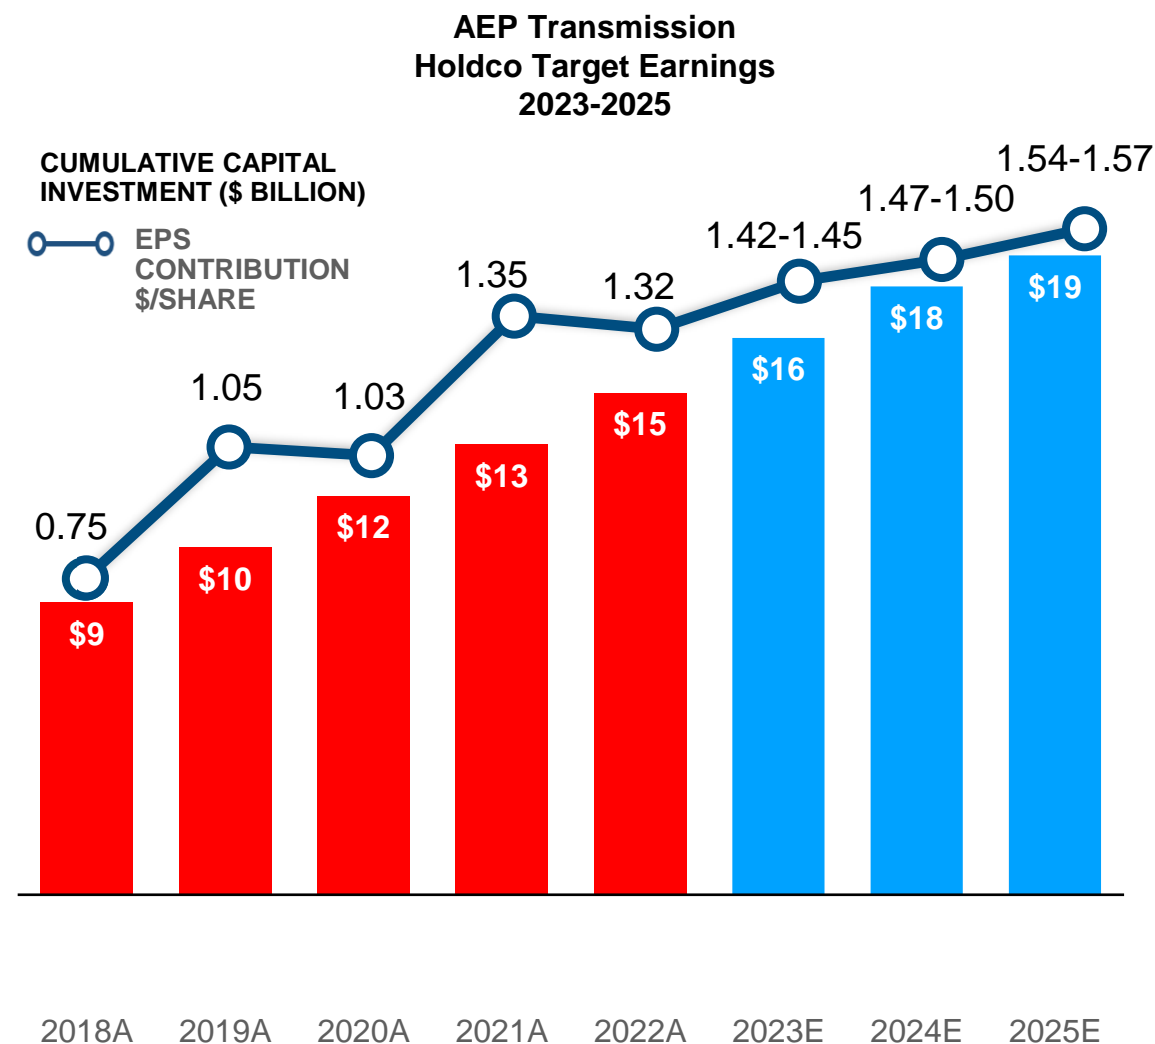

Net plant totals as of 3/31/2023.

¹ Debt issued at AEP Transco level for transmission companies.

AEP Transmission Holdco Delivering Significant Customer and Shareholder Value

Shareholder Benefits

Data adjusted to include Kentucky-related earnings.

Customer Benefits

Reducing customer costs

Enabling efficient economic dispatch of generation in each of our regions

Driving down emissions

Facilitating the fast and reliable interconnection of renewables to the grid to meet customer demand and public policy goals for clean energy

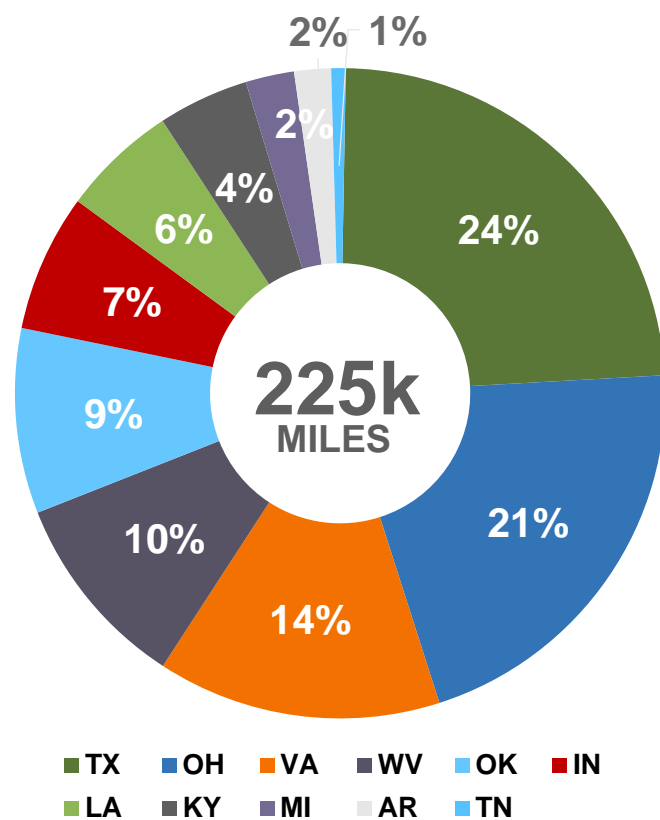

Improving reliability and security

Keeping the economy productive and connected by powering communication networks and electronics with reduced outages and a storm-hardened system

Creating economic benefits

Supporting economic development through construction projects that deliver community benefits including jobs, state and local taxes and economic stimulus

Transforming the Distribution Grid

INVESTING IN THE DISTRIBUTION GRID OF THE FUTURE

Improve Reliability and Resiliency through Broad Asset Renewal and Reliability Investments

Significantly Enhance Reliability Performance Across All Operating Companies

Accelerate Service Delivery to All Customers through Enhanced Capacity Investments

Enable Economic Development, Electrification and Decarbonization Across Our Customer Base

Expand Operational Flexibility and Visibility through Targeted Telecommunications, Monitoring and Automation Investments

Enable a Seamless 2-way Exchange of Information and Energy and Optimize Operations for All Customers

AEP's distribution system is among the largest distribution systems in the U.S.

AEP DISTRIBUTION SYSTEM AT A GLANCE:

DISTRIBUTION
SUBSTATIONS²

\$10.8B
5-YEAR CAPEX
(2023-2027)

¹ Includes approximately 36,400 miles of underground circuits.

² As of year-end 2022.

Distribution Organic Growth Opportunity

AEP's expansive, aged distribution system provides significant opportunity for investment and we are developing a portfolio of projects to address system needs and ramping-up our capabilities to execute these projects

2023-2027 CAPEX

DRIVERS

CAPACITY EXPANSION, RELIABILITY AND MODERNIZATION

Asset renewal and reliability investments including pole, conductor, cutout, station transformer and breaker replacements and capacity additions

CUSTOMER REQUESTS

Investments for new service, upgrades, relocation

AUTOMATION AND TECHNOLOGY

Implementation of automated technology including distribution supervisory control and data acquisition, smart switches and reclosers, volt-var optimization and sensors

RESTORATION AND SPARING

Storm restoration and spare equipment

ADVANCED METERING (AMI)

Advanced metering technology for the remaining AEP customers

RURAL BROADBAND

Investment in fiber assets to provide middle mile broadband to rural communities and for company use

DISTRIBUTION PIPELINE

Robust Pipeline Under Development

Significant capital investment opportunity over the next 10-years to renew the distribution system, improve reliability and resilience, and expand operational capabilities

Capital Flexibility

Additional investments in the pipeline are currently being planned to ensure long-term capital investment flexibility

Future Growth Drivers

Electrification and higher penetration levels of distributed resources will drive additional distribution investment opportunities

Resource Plans Are Aligned with Climate Goals

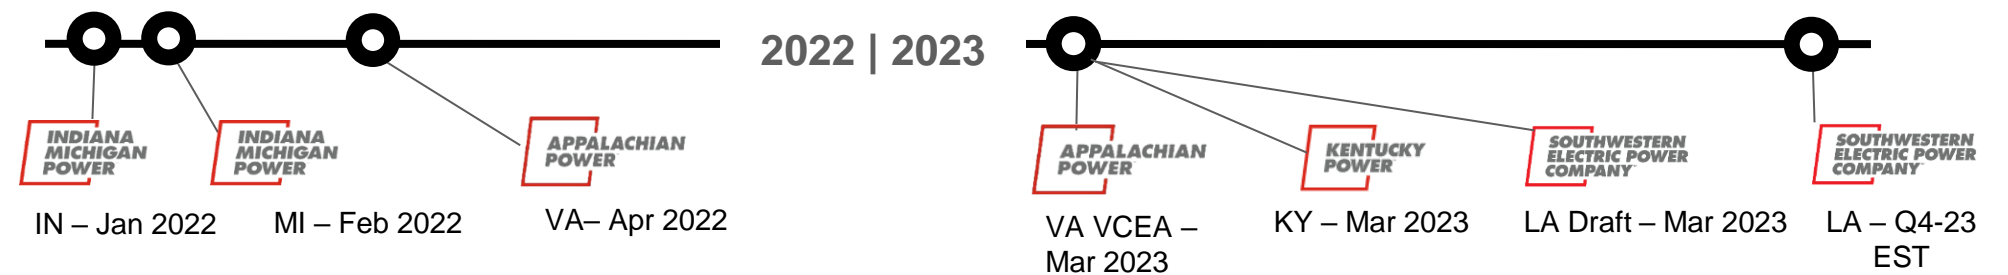

Current IRPs identify a significant need for new clean energy resources over the next 10 years

¹ Resource additions are from most recent Integrated Resource Plans (IRP) filings.

² Investments in renewables will be subject to market availability of viable projects and regulatory approvals.

³ Natural gas additions are peaking units and fuel switching that are primarily selected for capacity (i.e., expected low capacity factors).

IRP FILINGS

10-YEAR RESOURCE NEEDS

GENERATION ADDITIONS 2023-2032 (MW) ^{1,2}	SOLAR	WIND	STORAGE	NAT. GAS ³	TOTAL

Current Rate Case Activity

APCo – Virginia

Docket #	PUR-2023-00002
Filing Date	3/31/2023
Requested Rate Base	\$2.9B
Requested ROE	10.6%
Cap Structure	51.7%D / 48.3%E
Gross Revenue Increase	\$213M (Less \$53M D&A)
Net Revenue Increase	\$160M
Test Year	12/31/2022
<u>Procedural Schedule</u>	
Direct Testimony	7/14/2023
Rebuttal Testimony	8/11/2023
Hearing	8/24/2023
Expected Commission Order	Q4-2023
Expected Effective Date	January 2024

¹ Does not include \$75M of current riders moving to base rates.

² The settlement provided approval for more efficient cost recovery mechanisms with the continuation of T&D trackers.

³ Includes proposed pro-forma adjustment to plant-in-service through 12/31/2020.

⁴ The settlement reestablished the Formula Rate Plan for an initial three-year term starting with 2022 test year, to be filed in April each year with an effective date in August.

PSO – Oklahoma

Docket #	PUD 2022-000093
Filing Date	11/22/2022
Requested Rate Base	\$4.4B
Requested ROE	10.4%
Cap Structure	45.4%D / 54.6%E
Gross Revenue Increase	\$173M ¹ (Less \$70M D&A)
Net Revenue Increase	\$103M
Test Year	6/30/2022
<u>Settlement Summary²</u>	
Pending Commission Approval	
Settlement Filed	5/5/2023
Expected Commission Order	Q3-2023
Effective Date	6/1/2023
ROE	9.5%
Cap Structure	45.4%D / 54.6%E
Net Revenue Increase	\$50M

SWEPCO – Louisiana

Docket #	U-35441
Filing Date	12/18/2020
Requested Rate Base	\$2.1B
Requested ROE	10.35%
Cap Structure	49%D / 51%E
Gross Revenue Increase	\$114M (Less \$41M D&A)
Net Revenue Increase	\$73M
Test Year	12/31/2019 ³
<u>Settlement Summary⁴</u>	
Settlement Filed	1/13/2023
Commission Order	1/18/2023
Effective Date	1/31/2023
ROE	9.5%
Cap Structure	49%D / 51%E
Net Revenue Increase	\$27M

Actively Managing Current Fuel Cost Impacts

Adapting fuel clause recovery with a focus on customer impacts

APCo VA

- Current Mechanism: 12-month fuel clause to reset and account for prior year
- Adjustment: Reset base of fuel level with a 24-month recovery and carrying charge on under-recovered balance starting in September 2022

APCo/WPCo WV

- Current Mechanism: 12-month fuel clause to reset and account for prior year
- Adjustment: Securitization legislation effective March 2023; new fuel case filed in April 2023 proposes to use the securitization legislation to address deferred fuel balance

PSO OK

- Current Mechanism: 12-month fuel clause to reset and account for prior year
- Adjustment: Reset base of fuel level starting in October 2022 which includes 27 months to recover under recovered balance

SWEPCO AR

- Current Mechanism: 12-month fuel clause to reset and account for prior year filed annually in March, effective for April bills
- Adjustment: Filed an interim factor effective October 2022 to recover the under recovery in a 6-month surcharge; this makes the increase effective during the lower winter seasonal rate

SWEPCO TX

- Current Mechanism: May update the fuel factor up to three times per year in a process resetting fuel (filed only in January, May, and/or September); this is not done every year
- Adjustment: Updated fuel surcharge to collect the under recovered balance over a 16-month period starting in February 2023

Actions to Close the ROE Gap

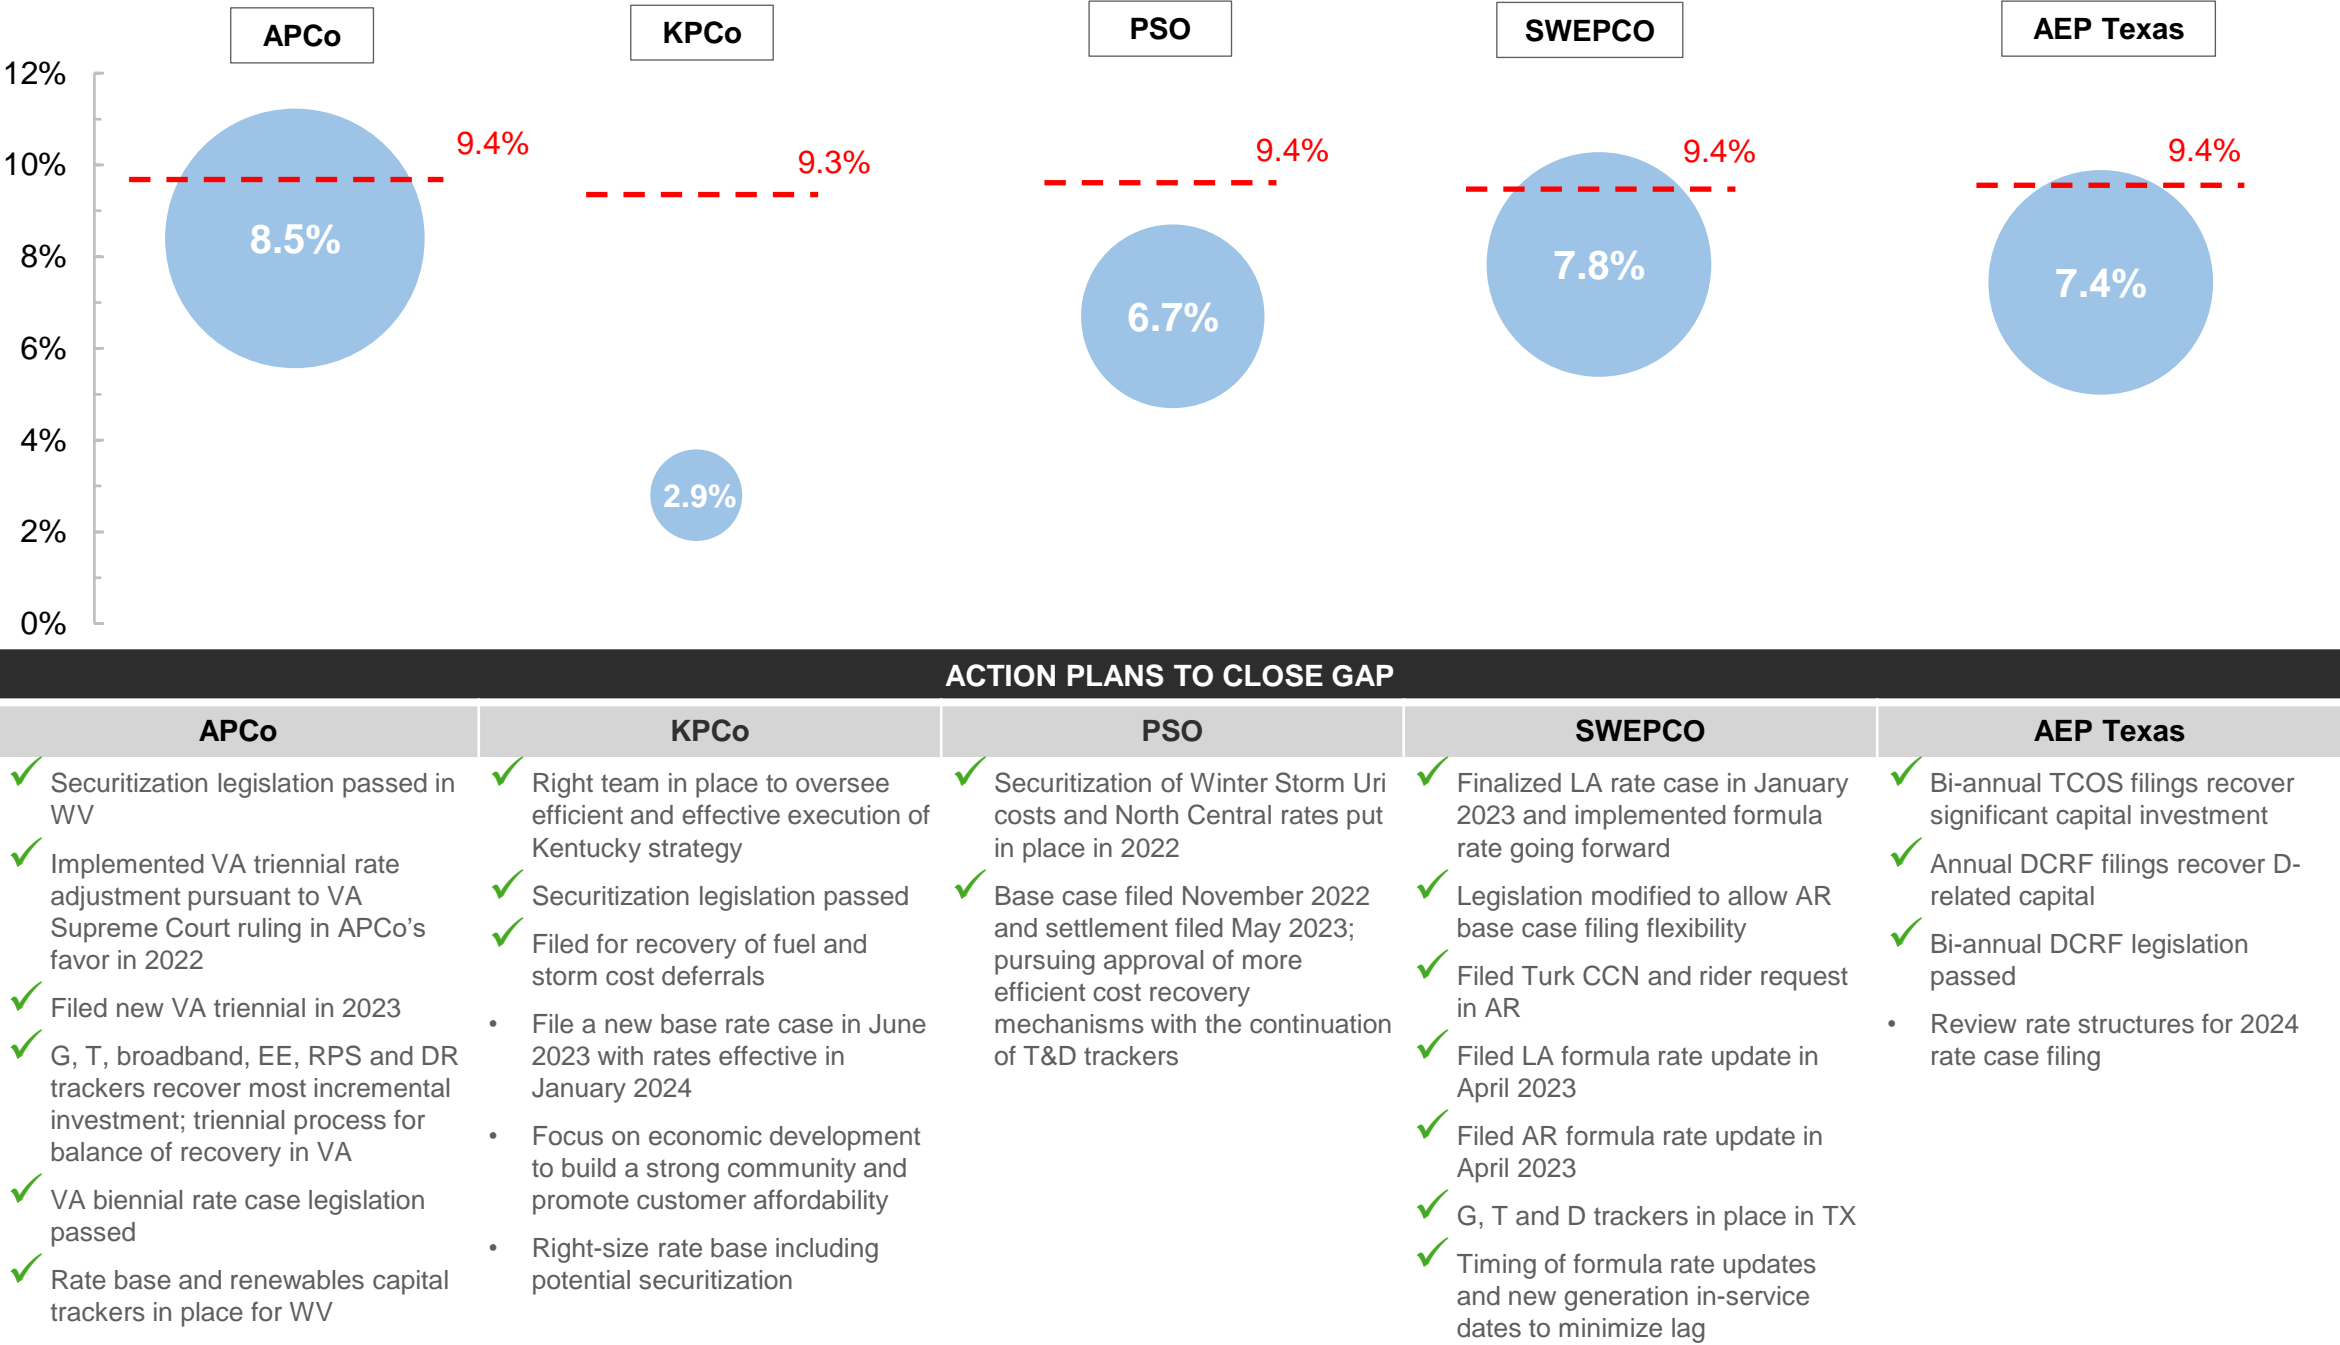

Focus on achieving authorized ROEs in all operating companies; 3/31/2023 Regulated Operations ROE of 8.8%

Other ROEs – 12 Months Ended 3/31/2023:

- AEP Ohio – authorized 9.7% vs earned 9.3%.
- I&M – authorized 9.7% vs. earned 11.3%.
- AEP Transmission Holdco – authorized 10.4% vs. earned 10.5%.

Authorized ROE in multijurisdictional companies is estimated by weighting various jurisdictional factors.

- Current Authorized ROE
- 12 Months Ended 3/31/2023 ROE (operating earnings, not weather normalized)
- ✓ Complete

Review of Multi-jurisdictional Regulatory Constructs

Allows customers and states greater flexibility in generation transformation

APCo

Owned Generating Capacity	7,461 MW
PPA Capacity	968 MW
Generating & PPA Capacity by Fuel Mix	
Coal	63.7%
Natural Gas	19.5%
Hydro, Wind & Solar	16.8%

SWEPCO

Owned Generating Capacity	5,009 MW
PPA Capacity	469 MW
Generating & PPA Capacity by Fuel Mix	
Coal	32.7%
Natural Gas	44.0%
Wind	23.3%

Recent State-level Divergence and Need:

- ELG investments for existing coal assets now approved in both Virginia and West Virginia
- Virginia Clean Energy Act (VCEA) mandated renewables now being planned and built to serve Virginia-jurisdictional customers
- Customer Focus – Develop renewables tariff and contract offerings to meet customer needs and support economic development
- Studying the Future – Reviewing IRA options and infrastructure support for new potential options in Appalachia

Recent State-level Divergence and Need:

- Arkansas portion of Turk was never included in rates due to Arkansas Supreme Court ruling; presenting the commission an option to allow customers to benefit from physical hedge provided by Turk
- North Central Wind declined in Texas and flexed up in Louisiana and Arkansas; costs/benefits of resource being direct assigned by states
- SPP raised reserve margin from 12% to 15%, driving further need for new supply for SWEPCO

Reviewing current construct to ensure individual states and AEP alignment on generation supply

- Reviewing path to dedicated state-by-state resources
- Determining process to organize resource mix based on state policy
- Applying lessons learned in past execution to manage the generation fleet

Economic Development Project Announcements: 2021 to Q1 2023

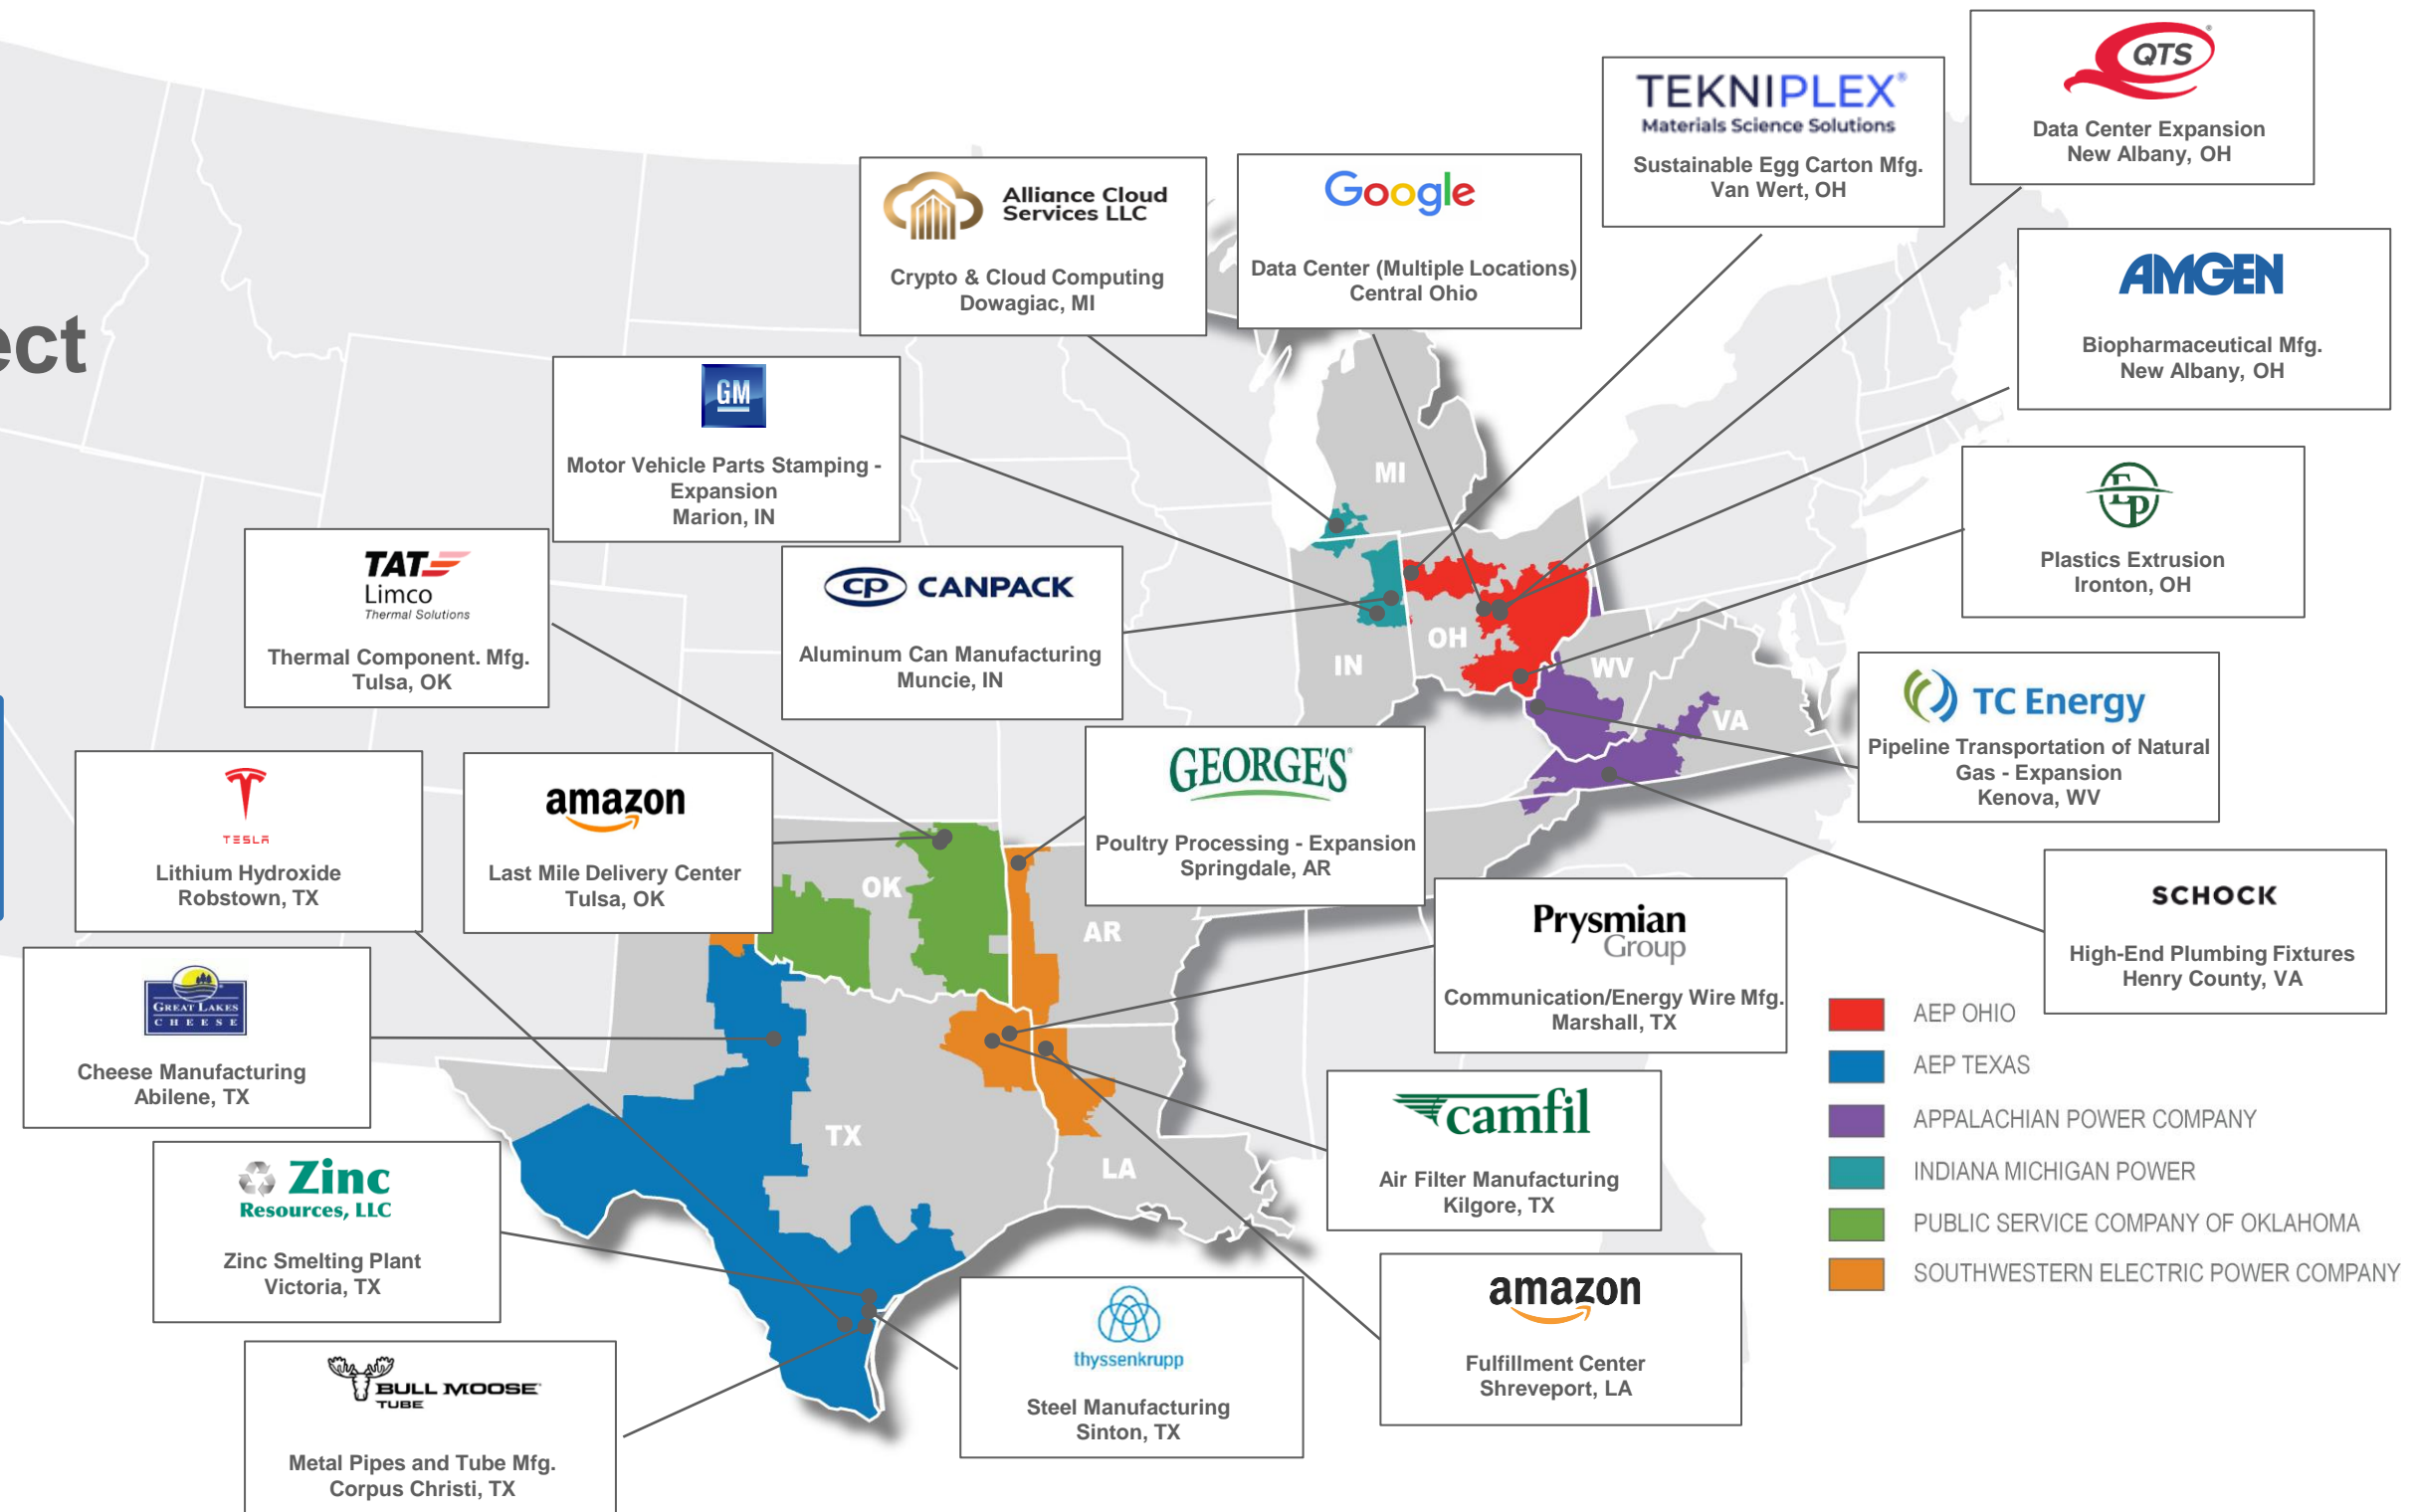

AEP has an attractive service territory for economic development

Summary of future impacts

25,600 direct jobs

74,500 total jobs

3,177 MW from 2021 to Q1 2023 announced projects

Recent AEP Reshoring Successes

Parts of AEP service territory in OH, VA and WV may be eligible for announced federal tax credits from the IRA

Nucor (APCo)

- The largest single investment in West Virginia history.
- Site chosen because of high voltage infrastructure, AEP's proven ability to serve large loads and AEP's excellent customer service.

Intel (AEP Ohio)

- \$20B investment at the first Midwest chip production plant.
- Property was annexed into AEP Ohio service territory.
- The site was selected because of AEP's competence in serving large loads, team strength and depth and demonstrated ability to meet Intel's unique needs.

Blue Star NBR (APCo)

- Largest economic development project ever for Southwest Virginia.
- Supported by Federal dollars designated for PPE production.

Lyseon North America (PSO)

- Automotive supplier to Navistar/IC bus plant in Tulsa, Oklahoma, for electric buses.
- Locating in large vacant facility at Tulsa Port of Catoosa.
