

AEP TRANSMISSION

(January 4, 2012)

Executive Vice President – AEP Transmission: Lisa Barton

The Executive Vice President – AEP Transmission is responsible for Transmission operations and new transmission business ventures.

Senior Vice President – AEP Transmission: Mike Heyeck

The Senior Vice President – AEP Transmission is responsible for AEP's 11-state transmission system, maintenance, operations, reliability compliance, and leading Transmission's customer interface with Operating Companies and wholesale customers

Senior Vice President –Transmission Strategy & Business Operations: Scott Smyth

The Senior Vice President – Transmission Strategy & Business Operations is responsible for transmission planning, dispatching and real time operations, technology, financial reporting and a new Business Operations arm responsible for developing and coordinating our internal and external growth strategies.

Vice President – Transmission Engineering & Project Services: Scott Moore

The Vice President – Transmission Engineering & Project Services is responsible for integrating the capital planning, system engineering, and maintenance management processes into a singular performance-driven strategic approach to managing transmission assets and for managing the service provider organization within the Transmission Division. These responsibilities include the development and application of performance measures and conducting competitive surveillance to evaluate profitability and cost-effectiveness of the asset management and service provider processes, and to provide direction of strategic and tactical transmission business plans. These responsibilities also include the engineering and design of new or refurbished transmission line and substation facilities; material/equipment requisitioning; related project and construction management; and right-of-way/property acquisition within project scope.
