"Safe Harbor" Statement Under the Private Securities Litigation Reform Act of 1995

Darcy Reese, Vice President

Investor Relations 614-716-2614 dlreese@aep.com

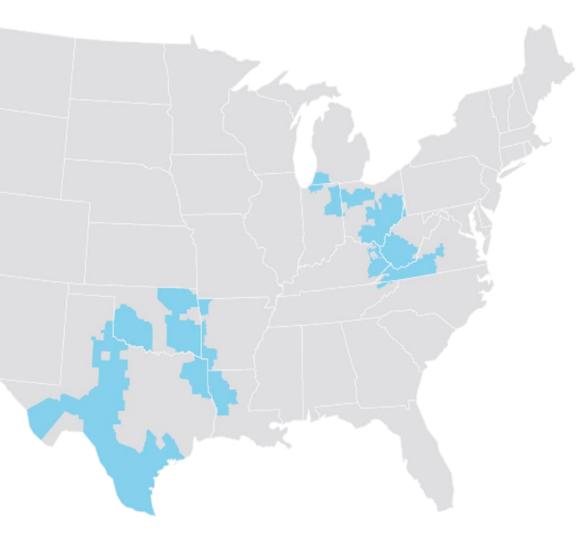

Annie Pribisko, Director

Investor Relations 614-716-2646 acpribisko@aep.com

This presentation contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. Although AEP and each of its Registrant Subsidiaries believe that their expectations are based on reasonable assumptions, any such statements may be influenced by factors that could cause actual outcomes and results to be materially different from those projected. Among the factors that could cause actual results to differ materially from those in the forward-looking statements are: changes in economic conditions, electric market demand and demographic patterns in AEP service territories, the impact of pandemics and any associated disruption of AEP's business operations due to impacts on economic or market conditions, costs of compliance with potential government regulations and employees' reactions to those regulations, electricity usage, supply chain issues, customers, service providers, vendors and suppliers, the economic impact of escalating global trade tensions including the conflict between Russia and Ukraine, and the adoption or expansion of economic sanctions or trade restrictions, inflationary or deflationary interest rate trends, volatility in the financial markets, particularly developments affecting the availability or cost of capital to finance new capital projects and refinance existing debt, the availability and cost of funds to finance working capital and capital needs, particularly (i) if expected sources of capital, such as proceeds from the sale of assets or subsidiaries, do not materialize, and (ii) during periods when the time lag between incurring costs and recovery is long and the costs are material, decreased demand for electricity, weather conditions, including storms and drought conditions, and the ability to recover significant storm restoration costs, the cost of fuel and its transportation, the creditworthiness and performance of fuel suppliers and transporters and the cost of storing and disposing of used fuel, including coal ash and spent nuclear fuel, the availability of fuel and necessary generation capacity and performance of generation plants, the ability to recover fuel and other energy costs through regulated or competitive electric rates, the ability to transition from fossil generation and the ability to build or acquire renewable generation, transmission lines and facilities (including the ability to obtain any necessary regulatory approvals and permits) when needed at acceptable prices and terms, including favorable tax treatment, and to recover those costs, new legislation, litigation and government regulation, including changes to tax laws and regulations, oversight of nuclear generation, energy commodity trading and new or heightened requirements for reduced emissions of sulfur, nitrogen, mercury, carbon, soot or particulate matter and other substances that could impact the continued operation, cost recovery and/or profitability of generation plants and related assets, the impact of federal tax legislation on results of operations, financial condition, cash flows or credit ratings, the risks before, during and after generation of electricity associated with the fuels used or the byproducts and wastes of such fuels, including coal ash and spent nuclear fuel, timing and resolution of pending and future rate cases, negotiations and other regulatory decisions, including rate or other recovery of new investments in generation, distribution and transmission service and environmental compliance, resolution of litigation, the ability to constrain operation and maintenance costs, prices and demand for power generated and sold at wholesale, changes in technology, particularly with respect to energy storage and new, developing, alternative or distributed sources of generation, the ability to recover through rates any remaining unrecovered investment in generation units that may be retired before the end of their previously projected useful lives, volatility and changes in markets for coal and other energy-related commodities, particularly changes in the price of natural gas, changes in utility regulation and the allocation of costs within regional transmission organizations, including ERCOT, PJM and SPP, changes in the creditworthiness of the counterparties with contractual arrangements, including participants in the energy trading market, actions of rating agencies, including changes in the ratings of debt, the impact of volatility in the capital markets on the value of the investments held by the pension, other postretirement benefit plans, captive insurance entity and nuclear decommissioning trust and the impact of such volatility on future funding requirements, accounting standards periodically issued by accounting standard-setting bodies, and other risks and unforeseen events, including wars and military conflicts, the effects of terrorism (including increased security costs), embargoes, naturally occurring and human-caused fires, cyber security threats and other catastrophic events, the ability to attract and retain requisite work force and key personnel.

Strategic Vision and Execution

ZERO HARM

STRONG, DIVERSE & INCLUSIVE CULTURE

6%-7% PER YEAR **EPS GROWTH**

OPERATIONAL EXCELLENCE

STRATEGIC PILLAR

AFFORDABLE

Enable equitable access to affordable and reliable electricity

CUSTOMER & COMMUNITY CENTRIC GROWTH

Expand investments and service offerings

CLEAN & RELIABLE

Lead the transformation to a clean energy economy through a grid utilizing zero carbon resources in an economically responsible manner

ADVANCE & ACHIEVE

Advance how we work to drive financial and operational excellence; empower teams to integrate technologies, analytics and risk mitigation tools for the benefit of our customers and communities

ENGAGE

Be a great place to work; inclusive and high performing culture; opportunity and growth; organization alignment and performance

STRATEGIC PRIORITIES

- Be an industry leader in cost efficiency while prioritizing spending appropriately to ensure safe and reliable service
- Grow our business while keeping rates at or below regional average and competing technologies
- Demonstrate the value received from our service and evolve rate design to recognize differences in our customers
- · Position AEP service territory more competitively (locations/rates/time to serve) to increase economic development and job growth
- Diversify our asset base and service offerings
- Advance electrification of the economy
- Maximize federal and state funding opportunities for infrastructure investment
- Transition to zero carbon reliable generation mix
- Build the transmission system of the future to facilitate the interconnection of zero carbon resources across and in between our regions
- Plan and develop the distribution system of the future to support electrification and integration of distributed loads and sources
- Simplify our organizational design and align decisions rights with accountability
- Drive cross functional optimization in our work, invest and focus on our core competencies, and leverage outside expertise for non-core skillsets
- Leverage technology and data to drive efficiency, quality and improved decision making
- Build and sustain a culture that embraces authenticity at work; foster a highly engaged, safe, inclusive work • environment promoting employee well-being
- and support to ensure employees are invested in and understand their link to AEP's overall success
- Create a continuous learning culture through expanded access to learning paths for all employees
- Develop and support leaders to excel in talent management, succession and development planning to effectively leverage the workforce

Equip the organization with effective goal planning, development planning and performance management processes,

Retail Business (Strategic Review)¹

BUSINESS MODEL

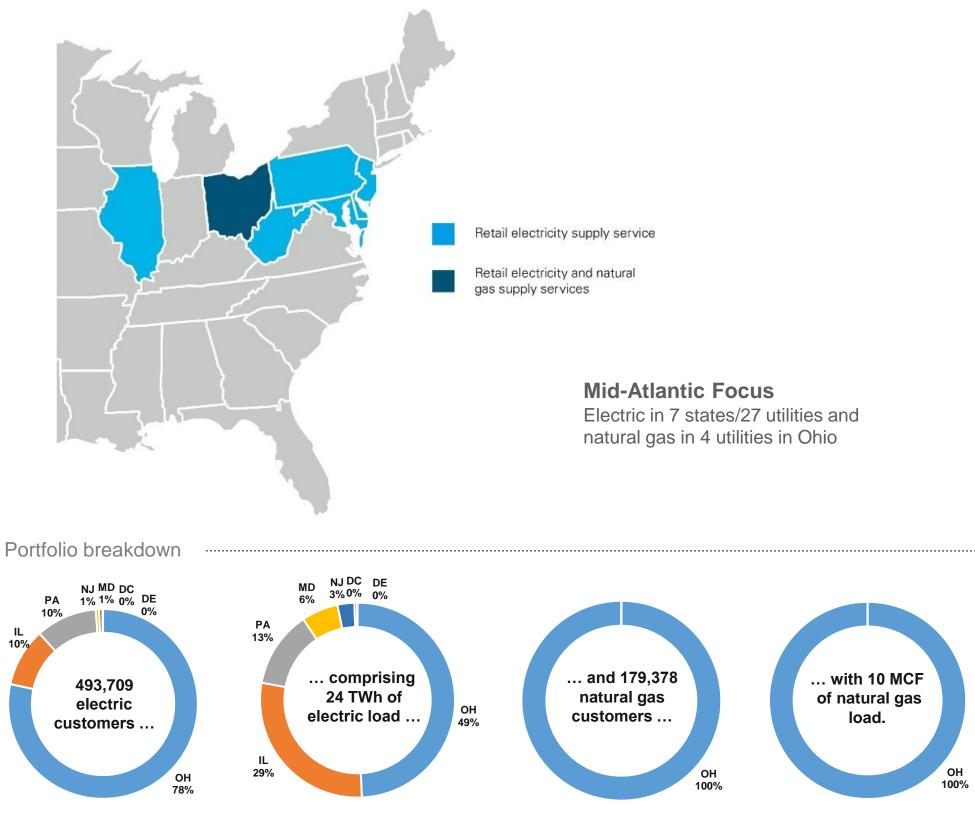

Commodity and Services Sales

- Focused where AEP operating companies can't offer solutions
- · Base platform is electric and natural gas sales
- Channel for distributed energy resources for resiliency and sustainability into sales offerings
- Integrates universal scale renewable supplies into retail sales
- Consultancy offerings focused on decarbonization and sustainability services and execution

Customer Expert for Platform

- Ranked #4 largest non-residential power retailer in PJM
- Ranked #8 largest residential nationally

¹ Management expects to complete strategic review in the first half of 2023. Retail business contributes \$0.06 EPS in 2022 operating earnings guidance and \$0.04 EPS in 2023 operating earnings guidance.

Distributed Resources Business

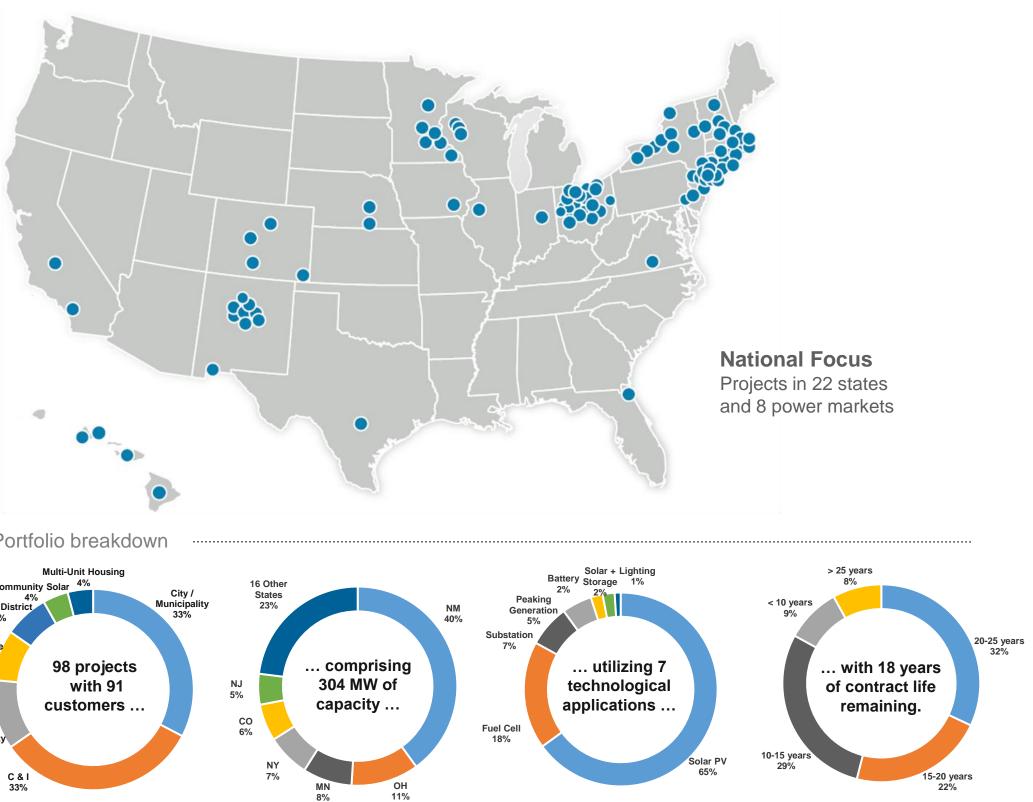

BUSINESS MODEL

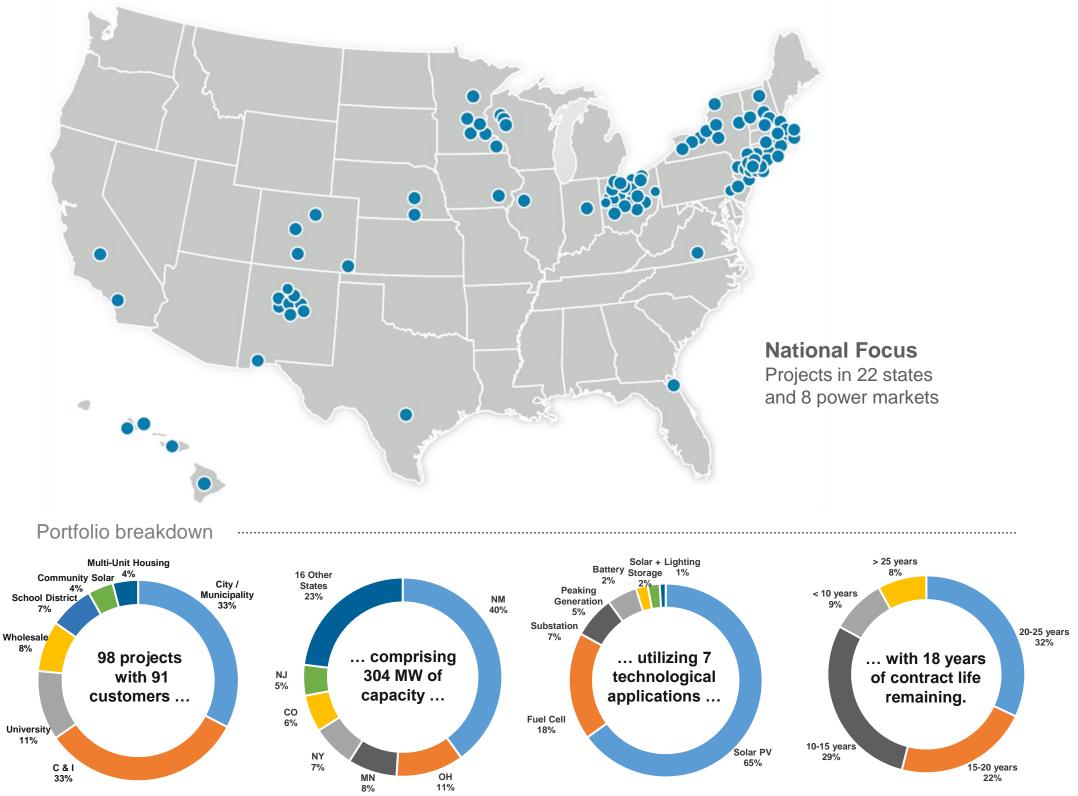

Customer Asset Development

- Customer centric business where AEP regulated businesses can't offer solutions
- Focused on behind-the-meter generation assets
- Assisting customers achieve:
 - > Cost savings
 - Progress toward sustainability targets
 - Energy resiliency and independence

Technology Expert for Platform

• Solar, fuel cells, batteries, reciprocating engines, substations, solar + storage and lighting

Wholesale Business

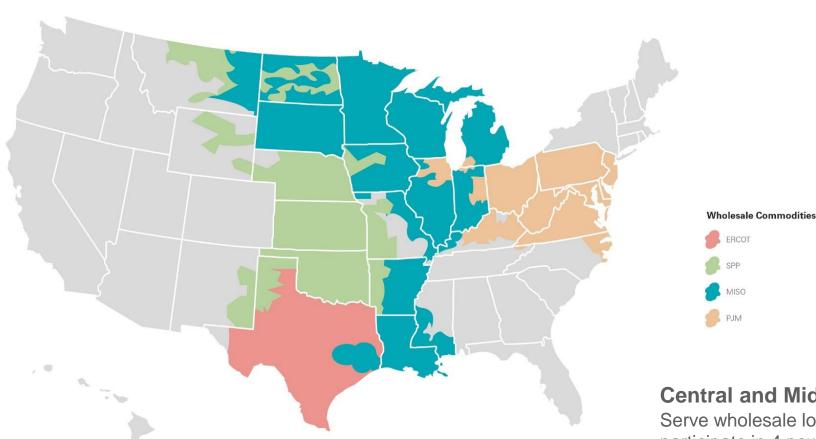

BUSINESS MODEL

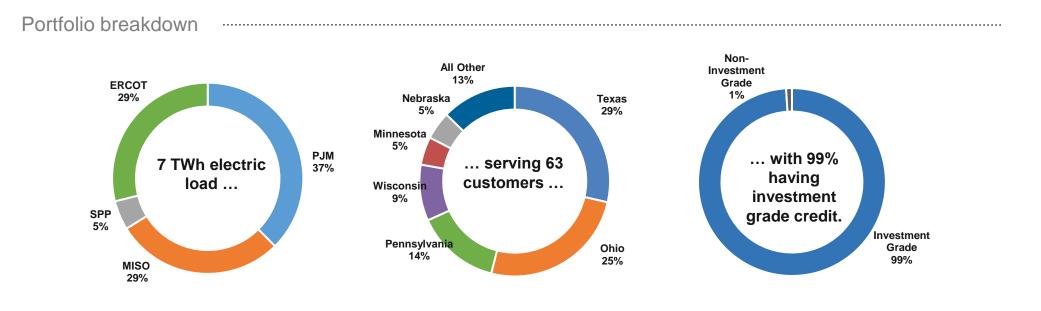

Portfolio Optimization

- Traditional municipal and cooperative customer portfolio
- Cardinal Plant and renewables PPA optimization
- Manages wholesale components of retail business including; energy, capacity, congestion, RECs and ancillary services

Risk Manager for Platform

- Low value at risk and low position limits
- Predominately hedged book
- Strict credit requirements

Central and Mid-Atlantic Focus

Serve wholesale loads in 12 states and participate in 4 power markets

Coal Fleet Transition

Transforming Our Generation Fleet

Committed to Being a Top ESG Employer

Commitment to ESG

ENVIRONMENTAL

SOCIAL

GOVERNANCE

- Accelerated CO₂ emission goals: 80% reduction by 2030 off a new 2005 baseline and accelerated net-zero goal by 2045
- 47% reduction in coal capacity as a percent of total capacity by 2032
- 2021 coal capacity = 13.1% of rate base; 2021 coal revenue = 13.6% of total revenue •
- Clean energy transition tied to long-term incentive compensation
- Promote diversity, equity and inclusion
- Service territory economic and business development
- Just Transition strategy
- Environmental and Social Justice Policy

- AEP Foundation Launched Delivering on the Dream: Social and Racial Justice grant program in 2021
- Zero Harm Safety Culture
- Human Rights Policy
- 13 Board of Directors, 11 independent directors
- 62% Board diversity
- Average Board tenure of 6 years
- Annual shareholder engagement on strategy and ESG matters with lead independent director participation
- Environmental reports provided at every Board meeting

Taking Bold Steps to Accelerate CO₂ Emission Goals

We Have an Achievable Pathway to Net-Zero by 2045

Planned Retirement and **Disposition of Select Fossil Units**

- Adding Solar, Wind, Natural Gas and Energy Storage to Our Generation Portfolio

 Building-out a Resilient and Reliable Grid to Efficiently Deliver Clean Energy to Customers

Closely Evaluating New Technologies to Further Reduce or Eliminate CO₂ Emissions

 Procure Carbon Offsets to Neutralize Any Remaining CO₂ Emissions from our **Generation Fleet**

We <u>rebased</u> our near-term CO₂ emission reduction target to 2005, <u>upgraded</u> our 2030 target to include full Scope 1 emissions and accelerated our netzero goal by 5 years

PRIOR GOAL: 80% REDUCTION IN **GEN FLEET CO₂ EMISSIONS BY 2030** OFF A 2000 BASELINE

NEW GOAL: 80% REDUCTION IN FULL SCOPE 1 CO₂ **EMISSIONS BY 2030 OFF A NEW 2005 BASELINE** AND <u>NET-ZERO</u> **BY 2045**

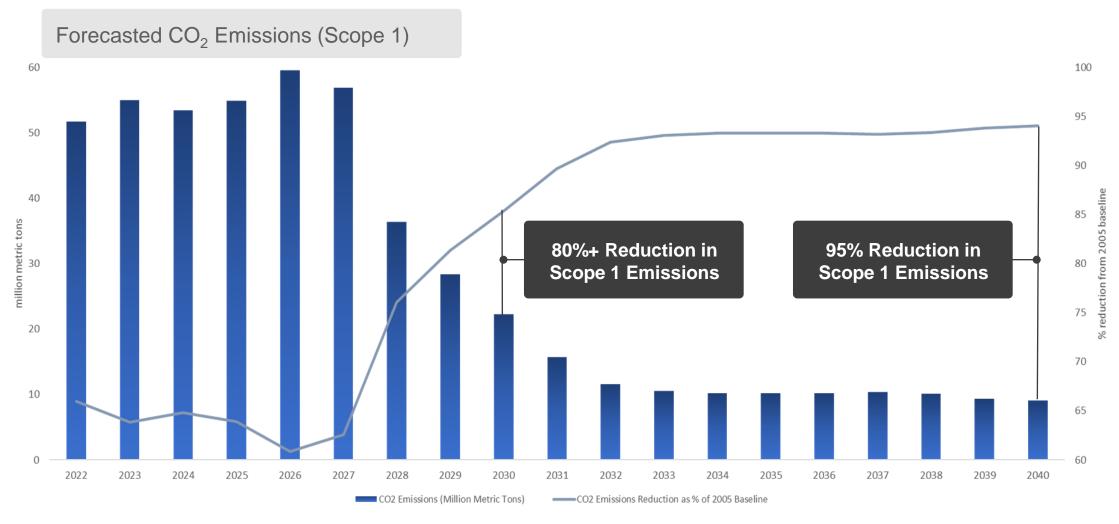

Climate goals remain highly assumption driven and are dependent upon factors outside of our control such as generation resource adequacy in our markets, access to clean energy projects, power/commodity market assumptions, federal and state public policy, development of new technologies. cost of abatement, ability to recover costs from customers, etc.

LONG TERM

Proven Track Record of Reducing Fleet Emissions

Projections based upon latest filed Integrated Resource Plans for regulated companies and also assumes an extension of the Cook nuclear power plant through the forecast period. Ability to meet the transition timeline is dependent upon market availability of resources, regulatory approvals, transmission system availability, etc.

63%

Reduction in CO_2 emissions from 152M metric tons in 2005 to 56M metric tons in 2021

Reduction in SO₂ emissions between 1990-2021

95% Reduction in NO_x emissions between 1990-2021

97% Reduction in mercury air emissions from 2001-2021

Continuing to Advance Our Coal Fleet Transition

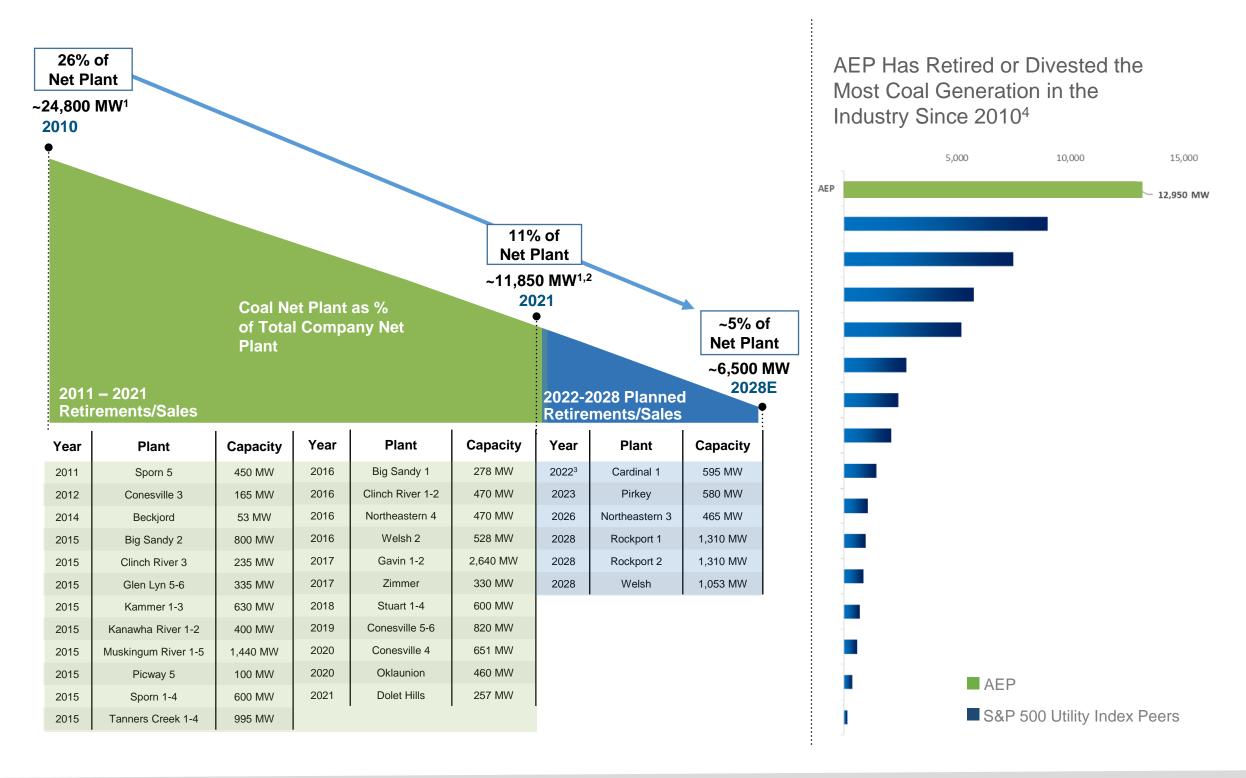

Coal-fired generation is projected to be less than 5% of AEP's Net Plant by YE 2028

² Includes 2012 Turk Plant addition.

³ In April 2022, AEP executed simultaneous agreements with Buckeye Power to sell Cardinal 1 and purchase 100% of the output through 2028 via a PPA. The sale was completed in August 2022.

⁴ Chart represents AEP vs. S&P 500 Utility Index peers; data sourced from 10-K filings and company presentations and publications.

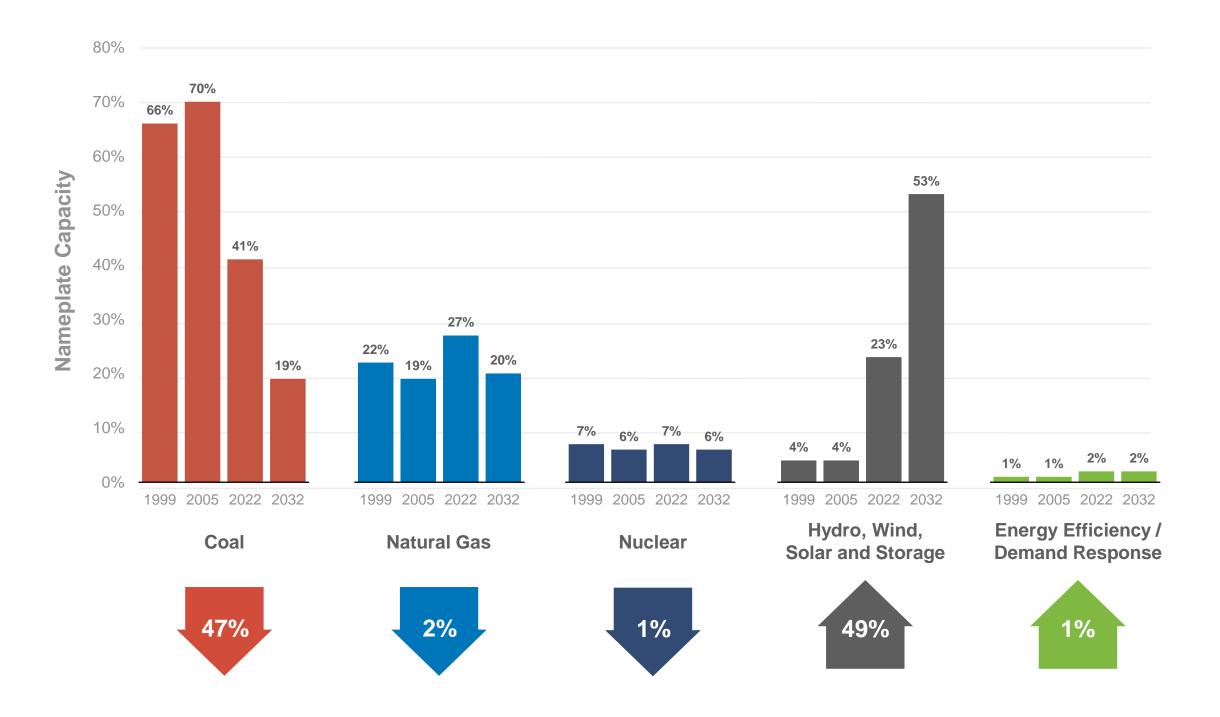

Transforming Our Generation Fleet

Capacity includes both owned and PPA generation. Energy Efficiency / Demand Response represents avoided capacity rather than physical assets.

2022 data as of 9/30/2022 and includes current capacity of KPCo. In October 2021, AEP entered into an agreement to sell its Kentucky operations to Algonquin Power & Utilities, and parties reached an amended agreement in September 2022. The sale is expected to close following regulatory approvals. 2032 includes forecasted additions and retirements and excludes previously identified projected resource additions for KPCo.

2032 coal capacity includes Amos, Mountaineer and Mitchell plants as both VA and WV approved ELG investment to keep optionality for these plants to operate post-2028. 2032 coal capacity also includes SWEPCO's Turk and Flint Creek plants.

2032 Hydro, Wind, Solar and Storage capacity includes unregulated contracted renewable assets business announced for sale in 2022. Excluding this capacity would not materially change 2032 projected capacity mix.

Linking Investments to Outcomes: Regulated Capital Investment Strategy

KEY INVESTMENT STRATEGIES

- **Transform our electric generation fleet** to drive down costs to customers and achieve our climate goals
- Develop a modern and secure electric transmission grid to bolster system reliability, enhance market efficiency and integrate new generation resources
- Modernize the electric distribution system to enhance reliability, accommodate changing resources, loads, advanced technologies and increase customer satisfaction
- Work with regulators, policymakers, and key stakeholders to ensure a durable and sustainable transition to a clean energy economy by balancing decarbonization goals and timelines with system reliability, resiliency, security and affordability

Our flexible and robust capital plan is designed to meet our customer needs and provide the ability to strategically shift capital to deliver on our 6-7% EPS growth commitment

Regulatory Initiatives

Regulatory Timeline of Kentucky Sale Current Rate Case Activity Actively Managing Fuel Cost Impacts Actions to Close the ROE Gap Review of Multi-jurisdictional Regulatory Constructs Economic Development Project Highlights Recent AEP Reshoring Successes

Regulatory Timeline of Kentucky Sale

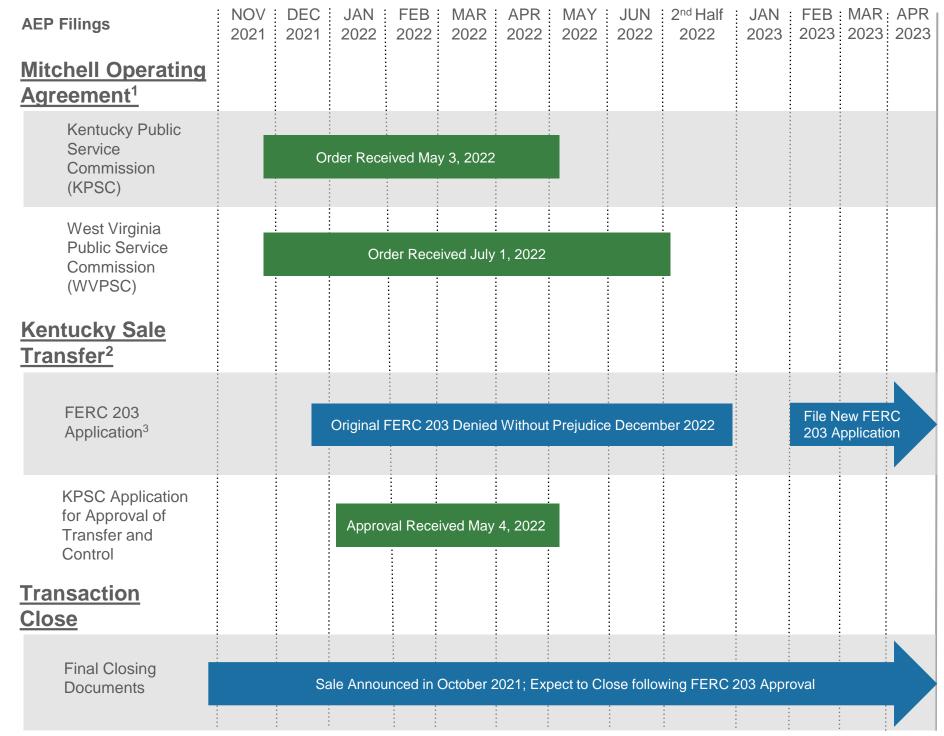

In October 2021, AEP entered into an agreement to sell its Kentucky operations to Liberty (Algonquin Power & Utilities), and parties reached an amended agreement in September 2022

As announced in January 2023, parties plan to file a new FERC 203 application requesting expedited approval; the sale is expected to close following FERC approval

¹ On 7/11/2022, AEP made a compliance filing as required by the WVPSC stating its plan to move forward under the existing Mitchell Operating Agreement to implement the near-term operational changes directed by WVPSC and KPSC. AEP also filed an update with KPSC sharing the same information. On 9/1/2022, AEP filed updates with the commissions providing resolutions adopted by the Mitchell Operating Committee consistent with the 7/11/2022 compliance filing.

² Committee on Foreign Investment in the United States and Hart-Scott-Rodino review; clearance from both was obtained in January 2022.

³ On 12/15/2022, FERC denied the 203 application without prejudice, stating the applicants failed to submit evidence that the transaction would not adversely affect rates. Parties plan to file a new FERC 203 application requesting expedited approval to close the transaction.

Mitchell Operating Agreement Update:

- Filings made July 11, 2022 with Commissions
- Move forward under existing Mitchell Operating Agreement

Kentucky Sale Transfer Update:

- Original FERC 203 denied without prejudice on 12/15/2022
- File a new FERC 203 application requesting expedited approval

Transaction Close Update:

 Expect close following FERC approval under the new FERC 203 application

Current Rate Case Activity

¹ APCo immediately filed an appeal of the commission order with the Virginia Supreme Court after the November 2020 order.

² In August 2022, commission issued a revised order to adjust the 2017-2019 VA triennial rate pursuant to VA Supreme Court ruling in APCo's favor.

³ Does not include \$75M of current riders moving to base rates.

⁴ Includes proposed pro-forma adjustment to plant-in-service through 12/31/2020.

⁵ In January 2022, an unopposed motion was filed to stay the hearing as parties engage in settlement discussions.

Actions to Close the ROE Gap

Focus on achieving authorized ROEs in all operating companies

ACTION PLANS TO CLOSE GAP				
APCo	PSO	SWEPCO	AEP Texas	
 WV: Rate base and renewables capital trackers in place VA: G, T, broadband, EE, RPS and DR trackers recover most incremental investment; triennial process for balance of recovery Exploring legislation in VA Filing new VA triennial in 2023 In 2022 – Implemented VA triennial rate adjustment pursuant to VA Supreme Court ruling in APCo's favor 	 Base cases for majority of recovery require continued filings Base case filed in November 2022; pursuing approval of more efficient cost recovery mechanisms (i.e. similar to peer formula rate request) and continuation or expansion of T&D trackers G tracker for future renewables In 2022 – Securitization of Winter Storm Uri costs and North Central rates in place 	 TX – G, T and D trackers in place Timing of formula rate updates and new generation in-service dates to minimize lag Finalize LA rate case and implement formula rate going forward In 2022 – AR formula rate plan in place In 2022 – Turk CCN filing and rider requested in AR 	 Bi-annual TCOS filings recover significant capital investment Annual DCRF filings recover D-related capital Pursuing regulatory and legislative options to further close gap Reviewing rate structures for 2024 rate case filing 	

Other ROEs – 12 Months Ended 9/30/2022:

- AEP Ohio authorized 9.7% vs earned 10.1%.
- I&M authorized 9.7% vs. earned 10.4%.
- AEP Transmission Holdco authorized 10.4% vs. earned 10.5%.

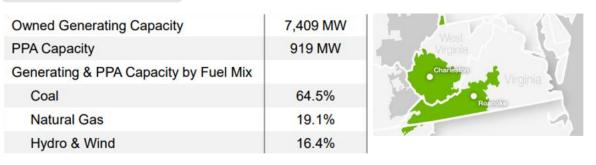

Authorized ROE in multijurisdictional companies estimated by weighting various jurisdictional factors.

Review of Multijurisdictional Regulatory **Constructs**

Allows customers and states greater flexibility in generation transformation

APCo

Recent State-level Divergence and Need:

- ELG investments for existing coal assets now approved in both Virginia and West Virginia
- Virginia Clean Energy Act (VCEA) mandated renewables now being planned and built to serve Virginia-jurisdictional customers
- Customer Focus Develop renewables tariff and contract offerings to meet customer needs and support economic development
- Studying the Future Reviewing IRA options and infrastructure support for new potential options in Appalachia

SWEPCO

Owned Generating (**PPA** Capacity Generating & PPA C Coal Natural Gas Wind

Recent State-level Divergence and Need:

Reviewing current construct to ensure individual states and AEP alignment on generation supply

- Reviewing path to dedicated state-by-state resources
- Determining process to organize resource mix based on state policy
- Applying lessons learned in past execution to manage the generation fleet

Capacity	5,298 MW	Uklahoma
	469 MW	Arkansas
Capacity by Fuel Mix		
	45.5%	
	41.8%	Texas
	12.7%	

Arkansas portion of Turk was never included in rates due to Arkansas Supreme Court ruling; presenting the commission an option to allow customers to benefit from physical hedge provided by Turk

 North Central Wind declined in Texas and flexed up in Louisiana and Arkansas; costs/benefits of resource being direct assigned by states

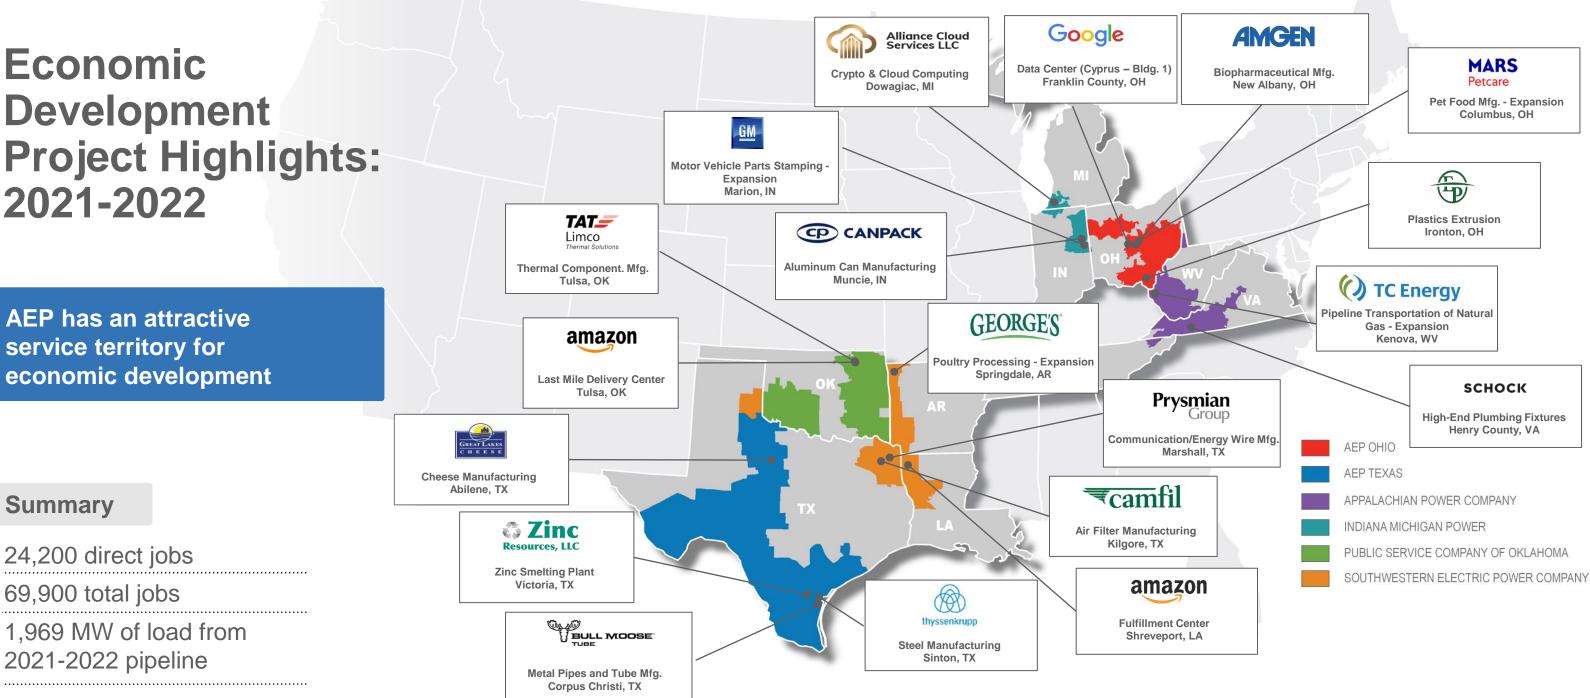

SPP recently raised reserve margin from 12% to 15%, driving further need for new supply for SWEPCO

Economic Development Project Highlights: 2021-2022

AEP has an attractive service territory for economic development

Summary

Recent AEP Reshoring Successes

Parts of AEP service territory in OH, VA and WV may be eligible for announced federal tax credits from the IRA

Nucor (APCo)

- The largest single investment in West Virginia history.
- Site chosen because of high voltage infrastructure, AEP's proven ability to serve large loads and AEP's excellent customer service.

Intel (AEP Ohio)

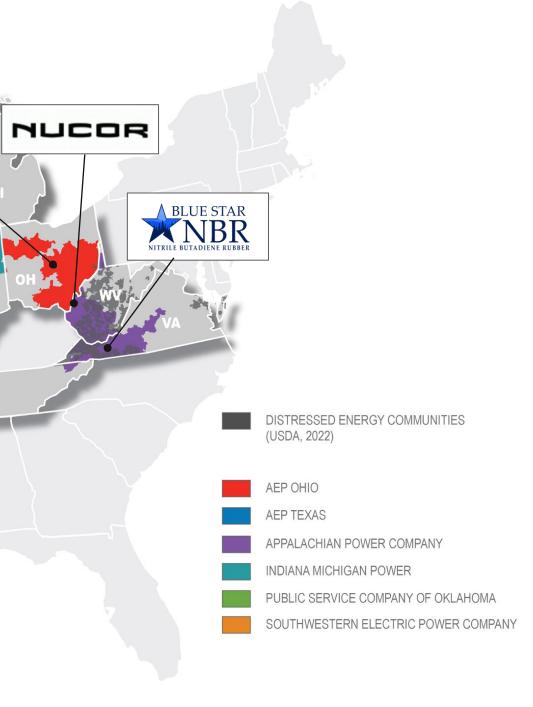

- \$20B investment at the first Midwest chip production plant.
- Property being annexed into AEP Ohio service territory.
- The site was selected because of AEP's competence in serving large loads, team strength and depth and demonstrated ability to meet Intel's unique needs.

Blue Star NBR (APCo)

- Largest economic development project ever for Southwest Virginia.
- Supported by Federal dollars designated for PPE production.

Lyseon North America (PSO)

- Automotive supplier to Navistar/IC bus plant in Tulsa, Oklahoma, for electric buses.
- Locating in large vacant facility at Tulsa Port of Catoosa.

(intel)
